Guidance on Host Economy Laws and Regulations relating to the Asia Region Funds Passport

THIS DOCUMENT CONTAINS GENERAL INFORMATION ONLY

This document sets out information that provides guidance to collective investment scheme (CIS) operators seeking to offer their CIS under the Asia Region Funds Passport (ARFP) in the economy of other participants as applying on commencement of the ARFP. This information is not meant to be exhaustive and may be updated or revised from time to time. This information does not constitute legal advice. Where in doubt, market practitioners are expected to seek independent professional opinion on how they can comply with the ARFP rules and the applicable requirements in the jurisdictions of the ARFP economies. The information for Korea and New Zealand generally reflects existing laws applying before amendments required for implementation of the Asia Region Funds Passport. Updated guidance will be provided when the relevant amendments are made as necessary for implementation.

1. Disclosure

| Japan | In Japan, the Financial Instruments and Exchange Act ("FIEA") and the Act on Investment Trusts and Investment Corporations are two laws that are applied to fund issuers. Disclosure based on the FIEA, through public inspection, covers the provision of information required for investors (including potential investors who are considering investing in funds) to make an investment decision. Disclosure based on the Act on Investment Trusts and Investment Corporations covers the provision of information pertaining to the investment status of the funds in question, to those who have already invested in the funds in question. |

[Disclosure based on the FIEA]
1. Disclosure at the point of issuance

To protect the investor, the fund issuer is required to submit a Securities Registration Statement ("SRS"), drawn up in the prescribed format, to the Japanese authorities before engaging in solicitation activities toward investors. The fund issuer may utilize the English-language disclosure system and submit English-language documents disclosed in other countries, instead of the SRS.

In addition, when engaging in solicitation activities, a prospectus containing the same contents as the SRS must be delivered to the investor.
Furthermore, for the investor to acquire the securities, it is necessary for the SRS to first take effect.

[1] Notification of Public Offering

In cases where the fund issuer carries out soliciting 50 or more persons to subscribe to newly issued funds (“Public Offering”) and the aggregate issue amounts of the fund are 100 million yen or more, it is mandatory to submit the SRS to the Japanese authority beforehand (Paragraph 1 of Article 4, Paragraph 1 of Article 5 of the FIEA).

The fund issuer who is required to submit the SRS may, instead of the SRS written in Japanese, submit a document written in English which has been already disclosed in a home country, based on the laws and regulations of that country subject to an approval by the Japanese authority; provided, however, that the fund issuer must attach a summary of the disclosure document in Japanese, description of disclosure items that are required to be included in the SRS but which are not included in the document disclosed in the home country), and a comparison table showing the difference between the Japanese form and the document disclosed in the home country Japanese authority (Paragraphs 6 and 7 of Article 5 of the FIEA).

[2] Drawing up / Delivery of the prospectus

When engaging in Public Offering, the fund issuer is required to draw up a prospectus that contains the name of the fund, the characteristics/features of the fund, investment risks, investment track record and other information that has a highly important impact on investor’s investment decisions (“Delivery Prospectus”), as well as a prospectus that contains detailed accounting information about the fund, its investment status and other information that have an important impact on investor’s investment decisions (“Request Prospectus”) (Paragraphs 1 and 2 of Article 13 of the FIEA).

In cases where the fund issuer and the financial instruments business operator, etc. have the investor acquire securities of the fund through Public Offering, they shall deliver the Delivery Prospectus to the investor in advance of, or at the same time as, having the securities (Paragraph 2 of Article 15 of the FIEA). Furthermore, when the investor requests the Request Prospectus, the fund issuer and the financial instruments business operator, etc. shall deliver the Request Prospectus to the investor immediately. (Paragraph 3 of Article 15 of the FIEA).
(3) Effective date of notification of the SRS
Notifications of the SRS concerning Public Offering of funds take effect on the day on which 15 days have elapsed since the date on which the SRS is accepted by the Japanese authority (Paragraph 1 of Article 8 of the FIEA).

2. Continuous disclosure
The fund issuer who has submitted the SRS is required to submit an Annual Securities Report ("ASR") for each calculation period of the fund, and to submit a Semi-annual Securities Report ("Semi-ASR") once every six months.

In addition, when an event that has an important impact on the investor’s investment decision arises, the fund issuer is also required to submit an Extraordinary Report.

The fund issuer may utilize the English-language disclosure system and submit English-language documents disclosed in a home country, instead of the abovementioned documents.

(1) Submission of ASR
The fund issuer who has submitted the SRS is required to submit to the Japanese authority, within six months after the lapse of the calculation period (within four months in the case of submitting a foreign company report using the English-language disclosure system), an ASR containing information pertaining to the investment of the fund assets, the accounting status for assets related to other similar businesses, important items related to the contents of other assets, and other matters, for each trust period of the Beneficiary Certificates of the foreign investment trust or each fiscal year of the issuer of the foreign investment trust (hereinafter, “calculation period”) (Paragraph 1 of Article 24 of the FIEA).

(2) Submission of Semi-ASR
In cases where the calculation period exceeds six months, the fund issuer who is required to submit the ASR is required to submit to the Japanese authority, within three months after the lapse of the period in question, a Semi-ASR containing information pertaining to the investment of the fund assets, the accounting status for assets related to other similar businesses, important items related to the contents of other assets, and other matters arising in the six-month period from the beginning of the period, for each calculation period (Paragraph 1 of Article 24(5) of the FIEA).
3. Submission of Extraordinary Report

When material changes arise in the basic policy or management structure for fund investment, and/or when other events that have an important impact on the investor’s investment decisions arise, those who are required to submit the ASR are required to submit to the Japanese authority, immediately and without delay, an Extraordinary Report containing the details of it (Paragraph 4 of Article 24(5) of the FIEA).

4. English-language disclosure system

The fund issuer who is required to submit the ASR, the Semi-ASR, and the Extraordinary Report may, instead of the abovementioned documents written in Japanese, submit documents written in English which have been already disclosed in a home country, based on the laws and regulations of that country \(^{\text{Note1}}\) subject to an approval by the Japanese authority; provided, however, that the fund issuer must attach a summary of the disclosure document in Japanese, description of disclosure items that are required to be included in the SRS but which are not included in the documents disclosed in the home country, and a comparison table showing the difference between the Japanese form and the document disclosed in the home country (Paragraph 8 of Article 24 of the FIEA, etc.). and the details can be found in http://www.jsda.or.jp/shiraberu/foreign/files/sakuseiyouryou1.5Chapter1.pdf \(^{\text{Note2}}\).

Note1: These documents were disclosed in a foreign country pursuant to the Foreign Regulations (i.e. a document which was made available for public inspection in such foreign country within a regulatory regime as opposed to a voluntary regime).

In cases where a document was prepared in English on a voluntary basis not pursuant to the Foreign regulations, such document does not qualify.

Note2: The use of this English-language disclosure system is allowed in case where the FSA Commissioner deems that the documents are not inadequate in terms of the public interest or investor protection, for each individual case.

3. Financial documents

The SRS, ASR, and Semi-ASR must contain financial documents that have been audited by a Certified Public Accountant as a part of the items pertaining to the accounting status, etc.
| | The financial documents must be drawn up based on accounting standards of the home country of the fund issuer in cases where the Japanese authority has allowed the fund issuer to use the home country’s standards, or accounting standards specified by the Japanese authority in cases where the Japanese authority has not allowed the fund issuer to use the home country’s standards.

In cases where the financial documents are audited by a Certified Public Accountant outside of Japan (including an accounting firm; the same applies hereafter), the Certified Public Accountant is required to notify the Japanese authority beforehand.

1. Scope of financial documents that should be disclosed
   With regard to Beneficiary Certificates of foreign investment trusts, financial documents pertaining to the trust assets and management company (non-consolidated) must be disclosed; with regard to Foreign Investment Securities, financial documents pertaining to the investment corporation must be disclosed.

2. Accounting standards for drawing up the financial documents
   The financial documents submitted by the fund issuer must be drawn up based on accounting standards of the home country of the fund issuer in cases where the Japanese authority has allowed the fund issuer to use the home country’s standards, or accounting standards specified by the Japanese authority in cases where the Japanese authority has not allowed the fund issuer to use the home country’s standards (Paragraph 5 of Article 131 of the Ordinance on the Terminology, Forms, and Preparation Methods of Financial Statements, etc.). All figures written in the disclosure documents are required to be converted into JPY. Therefore it is necessary to make a further column, for example next to its local currency, to show the relevant figure in JPY.

3. Scope of financial documents for which an audit attestation is required
   The fund issuer is required to provide an audit attestation for financial documents to be submitted for the funds (including financial documents related to the management company of a foreign investment trust), provided by a Certified Public Accountant from Japan or outside of Japan with no special interest in the funds (Paragraph 1 of Article 193(2) of the FIEA).

4. Audit report |
The audit report shall be prepared based on the results of the audit that has been conducted in accordance with the standards and the practices concerning auditing that are generally accepted as fair and appropriate.

The original audit report, which will be submitted to the regulator in the home country, and its Japanese translation are required to be provided. (Article 10-2(1) of the Cabinet Office Ordinance on Disclosure of Information, etc. on Regulated Securities)

(5) Notification by a foreign audit firm, etc.

When the Certified Public Accountant in a country outside of Japan carries out audit attestation work for financial documents to be submitted by the fund issuer to the Japanese authority, the Certified Public Accountant is required to notify the Japanese authority beforehand on matters including the overview of the audit work, and the name of the fund to be audited (Paragraph 1 of Article 34 (35) of the Certified Public Accountants Act).

In addition, when submitting the abovementioned notification, it is required to appoint an agent with an address in Japan, and who has the rights to act on behalf of the notifier with regard to all the actions pertaining to the notification (Article 3 of the Cabinet Office Ordinance on Foreign Audit Firms).

4. Other

The disclosure documents must be electronically submitted. When submitting the documents, it is also mandatory to appoint an agent residing in Japan.

(1) Procedures through an electronic data processing system for disclosure

The fund issuer who is required to submit the disclosure documents need to submit to the Japanese authority the information that should be contained in the documents through the Electronic Data Processing System for Disclosure (Electronic Disclosure for Investors’ NETwork, EDINET) (Paragraph 1 of Article 27(30)(3) of the FIEA).

(2) Appointment of agent

When submitting the disclosure documents, the fund issuer is required to appoint an agent with an address in Japan, and who has the rights to act on behalf of the issuer with regard to all the actions pertaining to the submission of notifications on the Public Offering and Secondary Distribution of the funds as well as the submission of the various reports (Paragraph 1 of Article 9, Paragraph 2 of Article 22, Paragraph 2 of
[Disclosure based on the Act on Investment Trusts and Investment Corporations]

(1) The issuers of Beneficiary Certificates of foreign investment trusts (hereinafter, “issuers”), in principle, are required to draw up an investment report on the trust asset of the foreign investment trust in question (hereinafter, “investment trust assets”) on the last day of each calculation period of the investment trust assets in question, and deliver this report to the known beneficiaries of the investment trust assets in question (Article 14 that shall be applicable mutatis mutandis pursuant to Article 59 of the Act on Investment Trusts and Investment Corporations).

(2) The investment report must comprise two documents: (1) an investment report containing detailed information on the investment status, etc. (comprehensive edition); (2) an investment report to be delivered, containing information on highly important items pertaining to the investment status.

① Investment report (comprehensive edition)
The items* to be contained in the investment report on foreign investment trusts (comprehensive edition) are set forth in Paragraph 1 of Article 63 of the Ordinance on Accountings of Investment Trust Property (hereinafter, Investment Trust Property Accounting Ordinance), as well as VI-3-2-6 (1) of the Comprehensive Guidelines for Supervision of Financial Instruments Business Operators, etc. (hereinafter, “Guidelines for Supervision”).

* The items are; a structure of a foreign investment trust including investment policy, status of transition on asset management of the foreign investment trust in the accounting period, a balance sheet on the last day of each accounting period, profit and loss statement and surplus statement in the accounting period and notes to these financial statements and category of investment assets, etc.

In principle, the investment report (comprehensive edition) must be drawn up on the last day of each calculation period of the investment trust assets in question, and be delivered. (Note3)

In the terms and conditions of foreign investment trusts, in cases where it is stipulated that the items to be contained in the investment report (comprehensive edition) are to be provided through a method involving the use of information communications technology, these items may be provided through such methods. In such cases, the issuer in question is regarded as having delivered the investment report (comprehensive edition) (Paragraph 2 of Article 14 that shall be applicable mutatis mutandis pursuant to Article 59 of the Act on Investment Trusts and Investment Corporations). Here, methods that involve the use of information communication technology include methods such as posting on a website and sending through e-mail (refer to Article 25(2) of the Order for Enforcement of the Act on Investment Trusts and Investment Corporations; the same applies to “② Investment report to be delivered” below). However, in cases where the beneficiary requests for the delivery of the written documents, the issuer is required to deliver the report in the form of a written document.

Note3: There are exceptions, such as in cases where it is acceptable to draw up/deliver reports every six months for investment trust assets with calculation period of fewer than six months (Article 59 of the Investment Trust Property Accounting Ordinance).
The items to be contained in the investment report to be delivered, pertaining to foreign investment trusts, are set forth in Paragraph 3 of Article 63 of the Investment Trust Property Accounting Ordinance. In addition, as VI-3-2-6(2) of the Guidelines for Supervision call for the inclusion of the same degree of information with the investment report to be delivered, pertaining to domestic investment trusts, as far as possible, it is necessary to refer to the guidelines on the drawing up of the report and the items to be contained in the investment report to be delivered, pertaining to domestic investment trusts (Article 58(2) of the Investment Trust Property Accounting Ordinance, VI-3-2-3 (3) of the Guidelines for Supervision, rules established by the Investment Trusts Association, Japan).

The drawing up of the investment report to be delivered has to be done on the last day of each calculation period of the investment trust assets in question, and be delivered (Article 25(3) of the Order for Enforcement of the Act on Investment Trusts and Investment Corporations).

If the consent of known beneficiaries has been obtained, methods involving the use of information communication technology may also be used (Paragraph 2 of Article 5 that shall be applicable mutatis mutandis pursuant to Paragraph 5 of Article 14 of the Act on Investment Trusts and Investment Corporations).

(3) The issuer is required to submit to the Japanese authority, immediately and without delay, the investment report (comprehensive edition) and the investment report to be delivered, after these reports have been drawn up (Paragraph 6 of Article 14 that shall be applicable mutatis mutandis pursuant to Article 59 of the Act on Investment Trusts and Investment Corporations).

(4) The investment report (comprehensive edition) and the investment report to be delivered must be drawn up in the Japanese language.

Copies of Class Orders, legislative instruments and regulatory guidance produced by the Australian Securities and Investments Commission (ASIC) can be obtained through [www.asic.gov.au](http://www.asic.gov.au).

**Point of sale disclosure**

For the issue or sale of interests in an ARFP fund seeking to make offers on that basis, the operator (as the issuer or to enable a seller) must give a retail client a product disclosure statement (PDS) prior to the issue or sale. There are exceptions to this requirement. For example a fundraising through personal offers of not more than $2 million over a 12 month period with not more than 20 investors, however in any event the application for entry to Australia will need to contain a complying PDS. The PDS is required to be prepared by the issuer.

**General content requirements**

A PDS must be titled "Product Disclosure Statement" and dated. It can be comprised of multiple documents given at the same time if each part identifies that is a part of the

---

1 Division 2 of Part 7.9 of the Corporations Act, in particular Subdivision C
2 See s761G and s761GA of the Corporations Act for the meaning of ‘retail client’
The information in the PDS must be worded and presented in a clear, concise and effective manner.

In addition to the specific content and other requirements outlined below, a PDS must contain ‘any other information that might reasonably be expected to have a material influence on the decision of a reasonable person, as a retail client, whether to acquire the product’. Material information in this instance might be, for example how the registered CIS works, the scheme’s structure and significant characteristics/features.

Information must be included in a PDS to the extent known to the issuer, and its directors and certain other associated persons. If not known, fees and costs must be estimated.

Specific content requirements
A PDS must include prescribed information, which is broadly:

- the name and contact details of the issuer or seller;
- information about significant benefits an investor may be entitled to;
- information about significant risks;
- information about the cost of the product and amounts payable by the holder of the product;
- information about the amounts that may be deducted from the fund;
- information about any commission (or similar) that may impact on the amount of return to an investor;
- information about the dispute resolution system that covers complaints by investors;
- information about tax implications;
- information about any cooling-off regime that applies (whether provided for by a law or otherwise);
- if the issuer or seller makes other information about the product available, how that information can be accessed;
- the extent to which labour standards or environmental, social and ethical considerations are taken into account in the selection of investments; and

prescribed details about fees and costs including presentation in Australian dollars, summarised as:

- the information must be in the prescribed form, which identifies establishment fees (fee to open an investment), contribution fees (fee on

---

3 Corporations Regulation, Regulation 7.9.16L
each amount contributed), withdrawal fees (fee on each amount taken out), exit fees (fee to close an investment), management costs (fees and costs for the management of an investment) and service fees – switching fees (fees for changing investment options). Information on transactional and operational costs must also be included;

- the information must be in dollar amounts or percentage;

- the information must set out how and when a fee or cost will be recovered;

- there must be an example of annual fees and costs in the prescribed format. The example must be for a balance of $50,000 with a $5,000 contribution, if there is no minimum balance requirement. If there is a minimum balance requirement, the example must be based on an amount that is the lowest multiple of $50,000 that exceeds the minimum entry balance;

- there must be a consumer advisory warning in the prescribed format – on the basis that differences in performance and fees and costs can have a substantial impact. The warning must be located at the beginning of the fees section.

For foreign passport funds, the PDS is required to identify the home economy for the fund and include a statement that:

- the operation of the fund is regulated by the law of the home economy for the fund; and
- the operator of the fund and the custodian of the assets of the fund are regulated under the law of the home economy for the fund; and
- the rights and remedies available to a person who acquires an interest in the fund may differ from the rights and remedies available in relation to a registered scheme; and
- information made available to members of the fund in the home economy will from time to time be made available to Australian members of the fund by posting the information on the fund’s website and how this may be accessed; and
• the rights of a member of the fund on the fund being wound up are mainly determined under the constitution for the fund and the law of the home economy for the fund.

The PDS also needs to include an outline of the main rights and remedies available under the law of the home economy for the fund to persons who acquire an interest in the fund in Australia.

Other requirements

If the interest will be traded on a financial market, the PDS must state that the product is able to be traded, an application has been made for the product to be able to be traded, or an application will be made within 7 days of the date of the PDS. The operator will not be able to issue interests in the fund if an application has not been made and after 3 months after the issue of the PDS, the interests are able to be traded.

There are requirements that apply to the inclusion in a PDS of statements by a person, or statements based on a statement by a person. In these circumstances, generally the person must have consented to the statement in the PDS and the PDS must state that the person has consented and the person has not withdrawn their consent before the date of the PDS.

The PDS must be up to date at the time it is given. A supplementary PDS or new PDS can be used to correct misleading or deceptive statements, correct an omission, update or add to the information in the PDS or change a minimum fundraising amount, minimum application amount or statement regarding quotation of interests. Information which changes in a non-materially adverse manner need not result in a new or supplementary PDS provided the information is updated on the internet and the PDS explains updated information will be available there.⁴

An application must be made on an application form that accompanied the PDS that was current when the application is made. ASIC has given some relief to allow distributors to issue tailored forms so long as they ensure the PDS is given. If there is a change to the PDS after it was given but before application was made a new PDS must be given and a new application made. If there is a material adverse change after the PDS is given and an application made but before issue, then to proceed, the operator has to give updated disclosure and an opportunity to withdraw within 30 days.

⁴ See ASIC Corporations (Updated Product Disclosure Statements) Instrument 2016/1055
The operator is required to give the PDS to a person or the person’s agent, personally, or send it to an address nominated by either. The PDS may be given electronically. There are limitations on who is considered an agent, in particular generally a financial services licensee or authorised representative of the licensee are not able to be agents. ASIC has given relief to allow a PDS to be made available on a website and for a notice (in printed or electronic form) to be given that the PDS is available on the website if the offeree agrees. ASIC has also given relief to permit a PDS to be given to a financial services licensee or authorised representative acting as the agent of the investor if the investor is not holding the financial product directly but rather directing a platform provider to acquire it on their behalf, provided the agent promptly gives or sends the PDS to the person.

The operator is required to lodge the PDS with ASIC. This includes any supplementary PDS or new PDS. The PDS must state a copy has been lodged but that ASIC takes no responsibility for the document. An issuer is not required to wait a prescribed time before offers can be made under PDSs lodged after gaining entry to Australia. This is distinct from the prohibition on offers during the initial consideration period of 15 business days commencing the day after an application for entry (with accompanying PDS) is lodged.

There is a shorter PDS regime and a short-form PDS regime, but these do not apply to ARFP funds in Australia. The PDS standard provisions apply regardless of form, e.g. if the offering of interests in ARFP fund is securities.

There is provision for ASIC to order that no issues be made under a PDS if it considers the PDS is defective. These stop orders can be made on an interim or ongoing basis.

Continuous disclosure

Generally the operator will be required to comply with the continuous disclosure provisions. Broadly, the provisions will apply where interests are in a listed CIS. They will also apply when interests in a class in a fund where there are at least 100 members of the class that were issued interests. The provisions require the issuer to generally immediately publicly disclose a matter that a reasonable person would expect, if it were

---

5 Class Order [CO 10/1219]
6 Class Order [CO 13/797]
7 Sections 1017B, 674, 675 of the Corporations Act
publicly available, to influence persons who commonly invest in securities in deciding whether to acquire or sell the securities.

If the continuous disclosure provisions apply, the PDS must include or be accompanied by copies of the financial statements and auditor’s report for the most recent financial year, or inform people of their right to obtain a copy of these documents from the issuer or seller. The PDS must also include statements about the ARFP fund being subject to a requirement to lodge with ASIC continuous disclosure notices and financial reports. The issuer must provide copies on request of recent disclosures.

If the continuous disclosure provisions do not apply, then the operator will be required to comply with the material change or significant event disclosure provisions. The provisions require the operator to notify retail clients of a matter or change to a matter, being a matter that would have been required to be specified in a PDS. Notification must usually be given as soon as practicable, for increases to fees and costs there are circumstances where notification must be given at least 30 days prior to the change.

**Financial reporting**

All ARFP funds must provide financial reports to Australian members of the fund, and to ASIC on an annual basis. Members must within 3 months of the end of the financial year for the fund be provided with a copy of a report for the fund prepared in accordance with financial reporting requirements in the home economy, and a copy of each auditor’s report that relates to this report. The fund must write to each Australian member at least once about their options for the format in which they can receive this annual reporting. These reports must also be lodged with ASIC, accompanied by a certified form setting out information regarding the fund and the dates of the financial year to which the reports relate.

**Periodic reports to members**

An operator is required to give a person who has acquired an interest in the fund as a retail client a written or electronic periodic statement at least once a year as soon as practicable, and in any event within 6 months after the end of the financial year or the member ceasing to be a member. The statement must contain information the issuer

---

8 Chapter 2M of the Corporations Act

9 s1017D of the Corporations Act
reasonably believes the holder needs to understand their investment in the financial product, including the opening and closing balance, the termination value, details of transactions in relation to the product, any increases in contributions, the return on the investment and details of any change in circumstances affecting the investment. For the information on details of transactions in relation to the product, the statement must also contain the prescribed information on fees and costs, including indirect costs – that the specified amount (as applicable) has been deducted and includes amounts that have reduced the return but not charged directly, total fees and costs paid in a dollar amount, details of incidental fees and service fees if not included elsewhere and whether the benefit of any tax deduction has been passed on the investor in the form of reduced fee or cost.10

Amounts must be stated in Australian dollars.

Updating ASIC information about foreign passport funds

Each year, ASIC will send the operator of a foreign passport fund an 'extract of particulars' shortly after the fund's designated review date. The extract will include information about the fund and the operator must respond if that information is not correct, or if ASIC has required the operator to provide particular information. The operator must also respond to any 'return of particulars' given by ASIC where ASIC believes information recorded about the fund is incorrect.

Reports required under the law of the home economy

Unless the operator of an ARFP fund is otherwise required under the Corporations Act to lodge a report with ASIC or provide a report to Australian members, the operator must provide Australian members of the fund a copy of any reports that it makes available to members in its home economy without charge. If all or part of the report is not in English, the operator must also give the Australian member a summary of the report, or that part of the report, in English.

Right to obtain copies of documents

An Australian member or former member of the fund who acquired an interest in the fund in Australia, or is ordinarily resident in Australia, may request from the operator a copy of the consolidated constitution of the fund. They may also request a copy of the register of members. The operator must provide a copy in English or in an official
language of the home economy of the fund within seven days after receiving the application. The applicant must pay the reasonable costs of providing the copy.

**Misleading or deceptive conduct**

All information used to market interests in an ARFP fund or to provide information about interests in an ARFP fund including advertising and reports must not be presented in a manner which is misleading or deceptive or is likely to mislead or deceive.

**Obligation to give additional information on request**

Where the operator is the issuer or seller of interests in the fund, it will be required to provide further information about the fund (outlined below) when requested by, in particular, a person who either

- has been given a PDS or should have been given a PDS and is not the holder of an interest in the fund; or
- an Australia financial services licensee or authorised representative of a licensee.

The further information is information that the operator has previously made generally available to the public and which might reasonably influence a person’s decisions as a retail client whether to acquire the financial product. Internal working documents, trade secrets, confidential material or information contained in a PDS are not required to be provided.

The information is only required to be given if it is reasonably practicable to do so and the person requesting the information pays any reasonable cost (charge) that the operator incurs that are reasonably related to giving the information.

The information must be given as soon as practicable after receiving the request and within 1 month of receiving the request.

Where the Corporations Act requires that a book be available for inspection, which is generally applicable to documents lodged with ASIC other than when ASIC accepts them

---

10 Corporations Regulation, Regulation 7.9.160, ASIC Regulatory Guide 97
11 1041H of the Corporations Act
12 1017A of the Corporations Act
on a confidential basis, it must be available for inspection at the registered office in Australia of the operator of the fund at any time when that office is open to the public.

**Confirmation of transactions**¹³

An operator is generally required to provide written or electronic confirmation of transactions for the acquisition of an interest in the ARFP fund, e.g. by issue or sale (if the seller), and for transactions that occur while a member holds the interest, e.g. a redemption or surrender of an interest in an ARFP fund. This applies to retail clients. The confirmation must identify the issuer and the member (holder), give details of the transaction including date and description and amount paid or payable and give details of any taxes or stamp duties payable in relation to the transaction. The confirmation may be provided directly or through another person (such as a financial services licensee) although the agreement of the member is required if the facility is not operated by or on behalf of the operator.

Confirmation must be given as soon as is reasonably practicable after the transaction has occurred.

---

**Korea**

### 1.1 The point of registration

A foreign CIS operator that seeks to offer ARFP funds to investors in Korea must first register the funds with the Financial Services Commission/Financial Supervisory Service (FSC/FSS) pursuant to article 182 of the Financial Investment Services and Capital Markets Act (“FSCMA”). As required under article 119 of the FSCMA, the operator must also file a registration statement for the public offering with the FSC/FSS, and no interests of a CIS can be publicly offered or sold unless and until the registration statement is accepted by the FSC/FSS. The FSC/FSS does not refuse to accept a registration statement unless it is not prepared in conformity with the prescribed form of the registration statement, there is any false description or representation in the registration statement concerning a material fact, or any description or representation of a material fact is omitted. Generally, a registration statement for foreign CIS becomes effective 15 days after it is accepted by the FSC/FSS.

**The Registration Statement**

---

¹³ 1017F of the Corporations Act
As required under article 129 of the Enforcement Decree of the FSCMA and article 2-11 of the Regulations on Issuance, Public disclosure, etc. of Securities, a registration statement filed by a foreign CIS must provide the following information:

1. Signatures of a representative director and a director responsible for filing registration under article 119(5) of the FSCMA on matters under any subparagraph of article 124 of the FSCMA;

2. The following matters concerning public offering or sale:
   - General matters concerning public offering or sale;
   - Details of rights to CIS publicly offered or sold;
   - Investment risks ensuing from acquisition of CIS publicly offered or sold;
   - The underwriter’s opinion on CIS publicly offered or sold (applicable only to cases where there is an underwriter); and
   - An attorney-at-law’s legal views and opinions.

3. The following matters concerning the CIS:
   - Name of the CIS;
   - Matters concerning the purpose, policy and strategy of investment;
   - Matters concerning management remuneration, sales commission, sales remuneration, and other expenses;
   - Matters concerning contributions (excluding cases where an investment trust (trust form) is involved);
   - Matters concerning financial status (excluding cases where the registration statement is filed for the first time);
   - Matters concerning the operator (including those concerning promoters and supervisory directors in cases of an investment company);
   - Matters concerning fund managers;
   - Matters concerning management of CIS assets;
   - Matters concerning sale and redemption of CIS interests or shares;
   - Matters concerning assessment and public disclosure of CIS assets;
   - Matters concerning distributions of profits and losses and taxation;
   - Matters concerning custodians and the general administration company: the entity that provides fund administration services (applicable only to cases
where there is a general administration company); and

- Matters concerning delegations of the CIS under article 42 of the FSCMA (applicable only to cases where business affairs of the CIS are delegated to a third party)
- Matters concerning the organization of the CIS;
- History of the CIS;
- Matters concerning management performance;
- Matters concerning comparative indices for calculation of performance of management;
- Other matters necessary for the protection of investors;
- Matters concerning the legal system related to the CIS;
- Matters concerning the accounting standards applicable to the CIS; and
- Matters concerning taxation and management of foreign exchange.

Additionally, each registration statement filed by a foreign CIS must be accompanied by the following documents as required under article 129 of the Enforcement Decree of the FSCMA and article 2-11 of the Regulations on Issuance, Public disclosure, etc. of Securities:

- The collective investment agreement (including attached documents);
- A copy of a delegation agreement (including documents attached thereto executed with the following persons:
  (a) The operator (excluding cases where an investment trust (unit trust) or an undisclosed investment association is involved);
  (b) The custodian;
  (c) The general administration company (applicable only to cases where some functions of the CIS was delegated to the general administration company); or
  (d) The delegatee (applicable only to cases where a CIS entered into a delegation agreement);
- A copy of an underwriting contract, where an underwriting contract was concluded with respect to the collective investment interests;
- A document proving equity capital, such as an audit report;
- An investment prospectus filed in a foreign country for a public offering or sale of the CIS;
• A certificate issued by a foreign financial investment supervisory authority to certify that the foreign operator has no record of having been punished by an administrative disposition, equivalent to or heavier than the suspension of business operation, imposed by the supervisory authority in its home economy or in Korea, or punished by a fine or any heavier criminal punishment, in connection with its operation of financial business or similar business during the latest three years or any other similar document;
• A document proving that the scale of assets in management at the end of the latest business year amount to not less than one trillion Korean won;
• A document proving the fact that the CIS is authorized pursuant to Acts and subordinate statutes of the home economy;
• A document concerning a liaison officer (local agent), such as a contract for appointment of a domestic agent;
• A preliminary prospectus, if it is intended to use a preliminary prospectus; and
• A simplified prospectus, if it is intended to use a simplified prospectus.

1.2 The point of sales

A registered CIS may be offered only through locally licensed distributors with one of the following FSC/FSS-registered prospectus pursuant to article 280 of the FSCMA. A CIS operator that seeks to publicly offer a registered CIS must provide a simplified prospectus to investors unless the investors separately request a prospectus. Additionally, the operator may also use a preliminary prospectus when publicly offering CIS interests/shares before its relevant registration statement becomes effective.

Prospectus

A CIS operator must file a prospectus on the effective date of the relevant registration statement. Generally, as the registration of foreign CIS becomes effective 15 days after it is accepted by the FSC/FSS, a prospectus is filed with the FSC/FSS 15 days after the relevant registration statement is submitted. In addition, information provided in the prospectus must be identical to the information provided in the registration statement for the CIS.

Preliminary Prospectus

A CIS distributor may also use a preliminary prospectus in order to publicly offer foreign CIS interests/shares to investors prior to its relevant registration statement becomes effective.
effective. The preliminary prospectus refers to a prospectus that has not become effective yet after the registration statement was accepted pursuant to article 120(1) of the FSCMA. As required under article 133 of the Enforcement Decree of the FSCMA, the section of title of a preliminary prospectus must contain statements as to the fact that the relevant registration statement has been filed with the FSC/FSS, but that the registration is not yet effective and that part of the descriptions thereof may be changed until the effective date.

**Simplified Prospectus**
A CIS distributor must use and deliver a simplified prospectus in order to publicly offer foreign CIS interests/shares to investors. The simplified prospectus refers to a document that has an abstract of important descriptions of the prospectus set out under article 124(2)(3) of the FSCMA. The distributor must inform investors of the fact that they are able to separately request a prospectus. In cases where any investors separately request to receive a prospectus, the distributor must furnish the prospectus to the investors instead of simplified one.

**1.3 On-going disclosure**
A foreign CIS is exempt from a variety of mandatory disclosure rules that apply to a domestic CIS such as ad-hoc disclosure prescribed under article 90 of the FSCMA. Yet the obligation to provide an asset management report to investors also equally applies to a foreign CIS as provided under article 280 of the FSCMA.

**Asset Management Report**
A foreign CIS operator must prepare an asset management report at least once every three months and furnish it to the investors after obtaining confirmation its custodian. The CIS operator is required to deliver the report to investors in person or through such means as the operators’ email, Internet website and mail. Additionally, the delivery can be omitted in cases where there is no possibility of undermining investors’ interests such as cases that fall under the following categories:

- An investor expresses in writing, by telephone, telegraph, fax, e-mail, or by any other means of electronic communication similar thereto, his/her intent not to receive an asset management report;
- An operator creates or establishes and manages a money market fund (MMF) and discloses an asset management report to the public at least once a month
in a manner prescribed and publicly notified by the FSC; or

- An operator creates or establishes and manages a closed-end fund (limited to cases where the CIS interests are listed in accordance with article 230(3) of the FSCMA) and discloses an asset management report to the public at least once every three months in a manner prescribed and publicly notified by the FSC.

The asset management report must contain information on how the CIS assets have been managed. Article 88(2) of the FSCMA provides the following information to be included in the asset management report. However, notwithstanding article 88 of the FSCMA, a foreign CIS operator may prepare and furnish an asset management report, as set out under the relevant foreign collective investment agreement:

- Assets, liabilities and NAV per interest/unit of the CIS as of any of the following days (“reference date”):
  (e) The date on which three months has elapsed from the commencement date of the fiscal term;
  (f) The last day of the fiscal term;
  (g) The last day of the contract term or the expiry date of the existence term; or
  (h) The date of termination or dissolution.

- A summary of management progress during the time period from the immediately preceding reference date (referring to the date of original creation or formation of the relevant CIS, if there is no immediately preceding reference date available) to the pertinent reference date (“pertinent management period”) and the matters concerning profit and loss during the pertinent management period;

- The ratio of the assessed value of each type of asset that belongs to the CIS property to the total value of the CIS property as of the reference date;

- The total number of shares traded, total trading volume of shares, and turnover rate prescribed under article 92(2) of the Enforcement Decree of the FSCMA during the pertinent management period;

- Details of investment assets that belong to the CIS as of the reference date;

- Matters concerning fund managers of the CIS;

- The investment environment and management plans of the CIS;

- Details of investment by type of business or country;

- Details of dividends in the settlement of accounts of the CIS (limited to the
- first asset management report to be prepared after the settlement of accounts;
  - Top ten items within the scope for investment of the CIS;
  - Structure of the CIS; and
  - Where the CIS trades derivatives for the purpose of avoiding foreign exchange risks, the details of such transaction.

The operator of an ARFP fund will be required to lodge a product disclosure statement (PDS) on the online register and ensure that each investor receives a copy of the PDS. PDSs are subject to prescriptive requirements regarding form, content (covering mandatory topics such as fees, risk of investment) and length (see schedule 4 of the FMC Regulations for further details). The intention is to provide sufficient information and to present it in a manner that would allow a prudent but non-expert person to understand the risks, benefits and costs and key terms associated with the investment. All material information relating to the offer that is not contained in the PDS must be included in the online register entry created by the ARFP fund. In addition, ARFP funds will be required to provide periodic and event based disclosure on the online register, and, in respect of breach reporting under the passport rules, to the FMA.

It is proposed that ARFP funds will also be required to give an information statement to each investor. This statement will provide investors with information about the ARFP regime and the differences between the offer made by the ARFP fund and “standard” retail funds registered in New Zealand.

| Thailand | **Registration of an ARFP Passport Fund in Thailand as a Host Economy**

A foreign CIS Operator that seeks to make public offerings of ARFP Passport Funds to investors in Thailand must first apply to the SEC for the ARFP Passport Fund to be approved for public offer in Thailand by submitting an application to the SEC Office.
together with evidentiary documentation pursuant to the SEC Notifications No. TorJor. 4/2561 and No. SorJor. 4/2561. The timeframe for the review of the application for entry into Thailand is within 15 working days from receipt of a complete application, which is in accordance with the Memorandum of Cooperation on the Establishment and Implementation of the Asia Region Funds Passport (the MOC).

As required under the aforesaid Notifications, the CIS Operator must file a completed and signed application form (or Form 35 – ARFP CIS) together with supporting documents (in hard copies) as listed below:

1. A registration statement (Form 69 – CIS full) (completed by CIS Operator);
2. Evidence demonstrating that ARFP Passport Fund is legally established under the law of Home Regulator’s jurisdiction (issued by Home Regulator);
3. Evidence on the appointment of a securities company to perform duty as local intermediary in Thailand (issued by CIS Operator);
4. Evidence on the appointment of a local representative in Thailand as the agent of CIS Operator (issued by CIS Operator);
5. Evidence on the appointment of an authorised person of CIS Operator (issued by CIS Operator);

As part of the application form, the CIS Operator must also submit a completed and signed registration statement (or Form 69 – CIS full) which includes the following supporting documents (in hard copies):

1. Fund Fact Sheet/Product Highlight Sheet;
2. Key Information comprising the registration statement and prospectus;
3. Certification of Information Accuracy; and

Please note that Form 35 – ARFP CIS and Form 69 – CIS full can be found online at the SEC website, http://www.sec.or.th/TH/SECIInfo/CB_ARFP/Pages/ARFP_main.aspx.

Language of documents submitted by CIS Operator

The application form and supporting documents which the CIS Operator submitted to the SEC Office may be in Thai or English language. The first used language in the
documentation submitted to the SEC Office shall be used for the subsequent
documentation submitted to the SEC Office thereafter.

In case where the submitted information and/or documents have been translated from
original information and/or documents in another language, the CIS Operator shall
ensure that the translator certifies that the translated content is accurate to that of the
original information and/or documents. In addition, the CIS Operator shall certify that the
content of the translated information and/or documents is based on facts or real
occurrences, and all facts that should be disclosed are not concealed.

Fund Fact Sheet
As required to be enclosed with the registration statement (or Form 69 – CIS full), the CIS
Operator must prepare the fund fact sheet in accordance with the fact sheet template
provided on the SEC’s website which can be accessible at
http://www.sec.or.th/TH/SECInfo/CB_ARFP/Pages/ARFP_main.aspx.

The SEC has specified the standard set of information to be presented, to ensure that
there is sufficient information for investment decision making. The fact sheet template
includes the following items:

(1) **What are you investing in?**
- Investment policy: details on type of assets that the fund may invest in,
  for example, equities, fixed incomes, derivatives and so on;
- Investment strategy: description of the fund’s investment strategy,
  for example, passive management / index tracking or active management.

(2) **For whom is this mutual fund suitable and unsuitable? What are the key risks of the fund?**
- Important risk warnings with respect to investment in the mutual fund;
- Risk indicator that represents the risk level of the fund between 1 to 8, in
  conjunction with a brief description of the risk and return trade off that allows
  investors to assess compatibility with their risk and return preferences. For example,
  in case of the fund with risk level 1 or 2, the fact sheet shall specify what type of
  investors that suits and does not suit this fund. For example:
  - This mutual fund is not suitable for:
    - Investors who seek returns equivalent to bank deposit and accept lower
      returns than investing in a typical fixed income fund;
o Investors who seek high liquidity;
o Investors who prefer low-risk investment;
• This mutual fund is not suitable for:
o Investors who expect high returns.

- Important risk factors shall disclose important risk factors relating to investment in the fund in accordance with the risk dimensions, possibility of occurrence, and the impact on the fund. This should range from the highest possibility of occurrence to the lowest, and, from the highest impact to the lowest one. For example:
o Credit risk shall be selected based on the credit rating of securities that the fund invested in over 20% of NAV;
o Market risks shall be considered based on portfolio duration and standard deviation per year of the fund;
o Exchange rate risk shall be selected based on the fund’s foreign exchange rate risk hedging policy. That is, whether it is a fully hedged, partially hedged, discretionary hedged, or unhedged; and
o High issuer concentration risk shall be selected based on total percentage of investment in any issuer exceeding 10% of NAV.

(3) Asset allocation
- Proportion of investment in specific types of assets (pie chart);
- List of top 5 holdings, and in case of investment in debt instruments, including deposits, credit ratings must be disclosed;
- Figure showing investment in debt instruments categorised by credit ratings.

(4) Fees and Charges — displays comparison between the level of fees specified in the prospectus and the actual fees charged to the fund and the unitholders in a tabular format.

(5) Fund performance
- Fund performance for the calendar year against benchmark in a figure format (at least 10 years or since inception if the fund has less than 10-year performance);
- Risks of the fund e.g. maximum drawdown, standard deviation, and tracking error;
- Rolling fund performance against benchmark: rolling performance such as 3-month, 6-month, 1-year, 3-year, 5-year, 10-year performance.
Other information — e.g. dividend distribution policy, names of trustee/fund supervisor and local intermediaries, registration date, subscription and redemption terms, names of fund managers, portfolio turnover ratio, contact details of selling agents, and link for details of conflict of interest transactions.

Prospectus

As part of the registration statement (or Form 69 — CIS full), the CIS Operator must also prepare and submit the latest version of prospectus as approved by, registered, or filed with the Home Regulator, together with a wrapper containing the additional information that is not yet covered in the latest version of the prospectus but required to be disclosed to investors as specified in the registration statement (Part II of Form 69 — CIS full) and other disclosure requirements stipulated under the SEC Notifications.

On-going disclosure requirements

Under Notifications No. ThorJor. 4/2561 and No. SorJor. 4/2561, the followings are on-going requirements for CIS Operator who makes public offerings of the ARFP Passport Fund in Thailand:

1. The CIS Operator is required to submit a hard copy of a completed and signed “Form 69 — CIS annually update” to the SEC Office within 1 year from the date on which the previously submitted registration statement, either “Form 69 — CIS full” or “Form 69 — CIS annually update”, as the case may be, becomes effective.

2. In case where there is a material change to the information specified in the effective registration statement of the ARFP Passport Fund and such change has been notified and approved by Home Regulator, the CIS Operator is required to submit a hard copy of a completed and signed “Form 69 — CIS material update” to the SEC Office within 10 working days from the date on which such material change occurs, exclusive of weekends and public holidays in Home Jurisdiction.

➢ Please click [here](#) to download “Form 69 — CIS annually update” and click [here](#) to download “Form 69 — CIS material update”.

3. In addition, the CIS Operator is required to prepare sales report for the sale of units of the ARFP Passport Fund offered in Thailand (as the case may be). This report shall be lodged with the SEC Office within 45 days from the last date of the calendar year that the solicitations of the units occurred.
➢ Please click here to download "Sales Report Form".

## 2. Capital controls

<table>
<thead>
<tr>
<th>Country</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Japan</td>
<td>Japan does not have capital controls.</td>
</tr>
<tr>
<td>Australia</td>
<td>Australia does not have capital controls.</td>
</tr>
</tbody>
</table>
| Korea  | There is no capital control that restricts foreign investors’ ability to withdraw their investment from Korea. Additionally, the Foreign Exchange Transactions Act and the Regulation on Entering Overseas Market of Financial Institution provide that a domestic financial business entity or a fund created and offered in Korea is required to file a prior notification with the FSC/FSS when making an offshore investment in a foreign entity (“investee”) that falls under any of the following categories:  
  - Investment in the investee is not less than 10% of the issued share capital (or the total investment), and the investment is to be made with the intent of participating in or influencing the management of the investee;  
  - The domestic financial business entity enters into a long-term contract for commodities or products or sharing of senior managers with the investee even though the share of the domestic financial business entity’s share of investment in the investee is less than 10%;  
  - The domestic financial business entity invests in an offshore entity (including offshore funds) through equity, fixed income, and derivatives securities; and  
  - A domestic financial business entity whose main office is located in Korea sets up a branch or an office overseas.  

Domestic financial business entities are also required to file a report with the FSC/FSS after disposing of or liquidating an offshore investment. Failure to comply with the reporting requirement for overseas investment may lead to administrative and/or criminal penalties including monetary penalties. |
| New Zealand | There are no capital controls in New Zealand apart from certain countries or circumstances when sanctions apply. Restrictions on the movement of capital may also result from the application of AML/CFT rules (although these do not prevent money being moved if a proper notification process has been carried out). |
| Thailand | Investors in Thailand are allowed to invest in ARFP Passport Fund without limitation imposed at personnel/ individual level. |
The SEC Office, with the authorisation granted by the Bank of Thailand, is responsible for allocating the foreign investment allotment to CIS Operator who wishes to offer ARFP Passport Fund in Thailand. Upon filing the application for streamlined authorization, CIS Operator shall seek approval from the SEC Office for foreign investment allotment by specifying the estimated amount of fund to be raised in the offerings of ARFP Passport Fund to investors in Thailand. In case of reaching the amount being allotted, the CIS Operator may seek further approval from the SEC Office by submitting a letter with supporting documents.

Additionally, the appointed local intermediaries are required to report electronically via a real time Foreign Investment Allotment System (FIA) for each of their clients who subscribes or redeems ARFP Passport Fund.

The CIS Operator may offer the units of ARFP Passport Fund in Thailand in either Thai baht (“THB”) or foreign currencies. However, the BOT has a strict policy on the transferring of THB to foreign economies. Therefore, if the CIS Operator chooses to offer ARFP Passport Fund in THB, the appointed local intermediaries or the corresponding banks holding Foreign Exchange license granted by the BOT shall convert THB to foreign currencies in the amount equivalent to that being raised in Thailand upon remittance. Please note that ARFP Passport Fund denominated in THB has to be offered in Thailand only.
3. Taxation

### Foreign funds managers

- In general, foreign ARFP fund manager will not be taxed unless it has a permanent establishment (“PE”) in Japan.
- A foreign ARFP fund manager may cause a PE to arise where it conducts business through an agent in Japan; however, an independent agent is excluded from the definition of an agent. For an agent to be considered an independent agent, such an agent must be legally and economically independent and must be acting in the ordinary course of its business when providing services as an agent. The FSA Guidance provides reference cases clarifying the meaning of an independent agent in the context of an investment management business. (See. [http://www.fsa.go.jp/en/news/2008/20080627-3.html](http://www.fsa.go.jp/en/news/2008/20080627-3.html)).

### Taxation on the resident investors in foreign ARFP fund

- In general, taxation for resident individual investors in publicly offered foreign ARFP fund is described below. Please note that the detailed analysis is required depending on the facts and circumstances.

<table>
<thead>
<tr>
<th>Type of Income</th>
<th>Tax rate *</th>
</tr>
</thead>
<tbody>
<tr>
<td>Profit Distribution</td>
<td>20.315%</td>
</tr>
<tr>
<td>Gains from Redemptions</td>
<td>20.315%</td>
</tr>
<tr>
<td>Gain from Sales</td>
<td>20.315%</td>
</tr>
</tbody>
</table>

### Foreign ARFP funds and operators

- Under Australia’s income tax law, non-residents are only taxed on their Australian sourced income. The tax is generally collected through a final withholding tax, based on the non-resident’s earnings in Australia in accordance with the following withholding rates:

<table>
<thead>
<tr>
<th>Income</th>
<th>Tax rate*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends</td>
<td>30%</td>
</tr>
<tr>
<td>Interest</td>
<td>10%</td>
</tr>
<tr>
<td>Royalties</td>
<td>30%</td>
</tr>
<tr>
<td>Managed Investment Trust fund payments</td>
<td>30%</td>
</tr>
<tr>
<td>(distributions referable to trust net income excluding dividends, interest, royalties, foreign source income and)</td>
<td>15% for residents of countries that have an effective Information Exchange Agreement with Australia (Australia has an Information Agreement)</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>capital gains on assets that are not taxable Australian property</td>
<td>Exchange Agreement with the ARFP countries</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
</tr>
</tbody>
</table>
* The withholding tax rates payable by non-resident investors may be reduced under Australia’s tax treaties with other countries.  
• In addition, if a foreign fund invests via an Australian fund manager, and provided it meets the appropriate tests, it will be able to disregard certain Australian income tax consequences.  
• This is known as an Investment Manager Regime (IMR) concession, and is outlined in more detail below.  

**Foreign (non-resident) investors in an Australian ARFP fund**

• Australian ARFP funds are likely to be offered through either a Managed Investment Trust (MITs) or the new corporate collective investment vehicle (refer below) once available. Both investment vehicle structures provide flow through taxation and investors will generally be subject to the same tax outcome; that is, investors will be taxed as if they had invested directly.  
• Non-residents are generally only subject to tax on Australian sourced income, including dividends, interest, royalties and MIT fund payments (distributions), which they have received or have had attributed to them. A MIT fund payment may include capital gains that relate to taxable Australian property.  
• Income relating to foreign source income and capital gains on assets from non-taxable Australian property (including on the sale or redemption of units in the fund) is generally not subject to tax, for non-residents.  
• Non-resident investors receive a withholding tax exemption for investments by an Australian fund in foreign assets.  
• Higher rates of tax may be payable if the investor is itself a trustee or holds its investment in the ARFP fund through a permanent establishment in Australia.  

**Australian resident investors in either a foreign or an Australian ARFP fund**

• Australian resident investors are generally taxed on distributions of Australian and worldwide sourced income and capital gains at year end (or in the case of trusts, the income attributable to an Australian resident investor).  
• Resident investors generally receive a foreign income tax offset where the distribution they received includes foreign sourced income on which tax has been paid.  
• Tax is generally payable by the resident investor on capital gains made on sale or redemption of shares/units in an ARFP fund.
• Australia has a progressive tax system, meaning the tax rate applied to individuals is dependent on their taxable income. Higher levels of net taxable income are subject to higher tax rates.
• Investors that are companies are subject to a corporate tax rate: Entities with aggregated turnover less than $50 million are currently subject to a corporate tax rate of 27.5 per cent. This will progressively be lowered to 25 per cent by 2026-27.
• If more than 80 percent of a company’s income is passive it will be ineligible for the lower corporate tax rate.
• The corporate tax rate for all other companies is 30 per cent.

Tax changes

Investment Manager Regime (IMR) changes
• The Government’s IMR reform provides that, subject to meeting the appropriate tests, foreign funds that invest via an Australian fund manager are eligible to access IMR concessions, in relation to disposal gains and losses
• That is, foreign entities can disregard certain Australian income tax consequences.
• This means that when a foreign investor invests in Australia through a foreign fund or an independent Australian fund manager it will be in the same tax position as if it had invested directly.

New collective investment vehicle
• The Government is in the process of implementing a corporate collective investment vehicle (CIV) that will provide non-resident investors with a vehicle structure that they are more familiar with.
• The corporate CIV will be a flow-through tax vehicle which means that investors will be taxed as if they had invested directly.

MIT tax changes
• The Government introduced a new class of MITs in 2016. This new MIT is known as an attribution MIT – the attribution method of tax provides greater certainty for trustees and beneficiaries of MITs by aligning the commercial and tax consequences of the activities of a MIT, while still providing flow-through of income and tax offset amounts with particular tax characteristics.
• The tax outcomes for investors remain broadly aligned with MITs.

Korea

Foreign CIS and fund managers

A foreign CIS or its fund manager is not subject to be taxed unless the CIS or the manager has no permanent establishment ("PE") in Korea.
Korean resident individual Investors

The general tax implications for individual investors in a foreign CIS may vary depending on the type of CIS.

Investment Trust:
- A Korean resident individual investor is subject to taxes on foreign sourced income in accordance with the IITA. Generally, income derived from and distributed from a foreign CIS is treated as dividend income subject to withholding tax at 15.4%.
- Apart from the aforementioned 15.4% withholding tax, an individual who invested in a trust-form foreign CIS and has greater than KRW 20 million annual incomes from investment in financial instruments at year end is subject to taxation. The amount exceeding KRW 20 million is added to the taxpayer’s other aggregate income and a progressive tax rate applies.

Investment Company:
- A Korean resident individual investor is subject to taxes on foreign sourced income like the above. On the other hand, income from the disposal of foreign CIS shares is regarded as capital gain subject to withholding tax at the rate of 22%.

<table>

<td>15.4%</td>
<td>22.0%</td>
</tr>
</tbody>
</table>

New Zealand

New Zealand residents are taxed under New Zealand rules in relation to income from domestic or foreign sources. Income from foreign sources is taxed differently. Tax implications are complex and investors may require independent advice.

We think it likely that foreign ARFP fund managers will not be required to have a taxable presence in New Zealand.

The same situation should apply to foreign investors in New Zealand funds as they will not be a resident for tax purposes in New Zealand.
Please see the EY Report “Asia region funds passport – the state of tax” for further information.

<table>
<thead>
<tr>
<th>Thailand</th>
<th>1. Foreign CIS operator offering interest in Thailand:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- According to Section 76 Bis of the Thai Revenue Code, the Revenue Department of Thailand will generally conclude that, where a foreign company 1) appoints an agent (employee, representative, go-between); and 2) earns income/profit in Thailand, the income/profit earned from business carrying on in Thailand will be taxable in Thailand and its agent will be deemed as a permanent establishment (“PE”) of the foreign company.</td>
</tr>
<tr>
<td></td>
<td>- However, where there exists a double tax agreement between Thailand and the country of the foreign company, the Revenue Department may not deem the agent as a PE of the foreign company if the Revenue Department considers the agent to be ‘independent’ from the foreign company</td>
</tr>
<tr>
<td></td>
<td>- Based on SEC’s study of past cases, the Revenue Department had focused on the level of income the agent receives from the foreign company (as a % of the agent’s total income) in assessing the independence of the agent. Nevertheless, the Revenue Department stresses that the assessment will be done on a case-by-case basis.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>2. Thai local investors investing in a foreign ARFP Passport Fund will be taxed as follows:</th>
</tr>
</thead>
<tbody>
<tr>
<td>- For a local corporate investor – dividend income and capital gain are includable in the net profit computation for corporate income tax purposes; and</td>
</tr>
<tr>
<td>- For a local non-corporate investor – dividend income and capital gain are required to be included in gross income when calculating year-end personal income tax when such income is remitted into Thailand in the year in which it is derived.</td>
</tr>
</tbody>
</table>

A local non-corporate investor refers to any investors who stays in Thailand for a period aggregating to 180 days or more in a tax year.

* A non-resident investor who invests in foreign ARFP Passport Fund and receives dividend income or capital gain from the foreign ARFP Passport Fund has no duty to pay tax according to the Thai law.

2. Foreign investment corporations
Items to be included in the notification documents (Paragraph 1 of Article 220 of the Act on Investment Trusts and Investment Corporations, Paragraph 2 of Article 261 of the Order for Enforcement of the same Act)

- Purpose, trade name, and address
- Items pertaining to the organization and executive officers
- Items pertaining to the management and investment of assets
- Items pertaining to calculation, and the distribution of profits
- Items pertaining to rights indicated on Foreign Investment Securities
- Items pertaining to the refund or repurchase of Foreign Investment Securities
- In addition to the above, matters set forth in each item of Paragraph 2 of Article 261 of the Order for Enforcement.

Notification documents are required to be drawn up using Appended Form 20 of the Order for Enforcement of the Act on Investment Trusts and Investment Corporations, while details on the outline of the contents are set forth in VI-3-2-7 of the Guidelines for Supervisions.

Attachments (Paragraph 2 of Article 220 of the Act on Investment Trusts and Investment Corporations, Paragraph 3 of Article 261 of the Order for Enforcement of the same Act)

- The certificate of incorporation of the foreign investment corporation or documents equivalent thereto
- In addition to the above, written documents set forth in each item of Paragraph 3 of Article 261 of the Order for Enforcement

Local agents

When submitting the notifications pertaining to foreign investment trusts and foreign investment corporations described in 1. and 2. above (including notifications on changes arising in the notifications in question), it is stipulated that it is mandatory to determine the parties with an address in Japan, and who has the rights to act on behalf of the fund issuer with regard to all the actions pertaining to the submission of the notifications in question (hereinafter, “local agents”) (Article 95 and Article 260 of the Order for Enforcement).

When the local agent (assumed to be a lawyer) deals in Public Offering of ARFP funds in Japan, he or she receives cooperation and advice from an Agent Association Member, and carries out the translation/drawing up of documents necessary for carrying out Public Offering in Japan, such as disclosure documents including SRS and ASR, and sale/solicitation documents such as a prospectus, basic terms and conditions.
of the investment trust, and written documents prior to the conclusion of contracts. At the same time, he or she also liaises and coordinates with the fund issuer in the home country (refer to “5. Local agent” for details).

Note 2: An Agent Association Member refers to a member of the Japan Securities Dealers Association who carries out work such as the distribution of the prospectus and publication of net asset value, on behalf of the issuer or local underwriter of Beneficiary Certificates of foreign investment trusts or of Foreign Investment Securities of foreign investment corporations, based on contracts with such issuers or local underwriters, concerning the domestic sale of such securities.

➢ There are related stipulations pertaining to the sale of foreign investment trusts/foreign investment corporations in Japan in the voluntarily established regulations “Rules concerning Foreign Securities Transactions” established by the Japan Securities Dealers Association, which is a voluntary regulatory organization with sales business operators in Japan as its members.

Article 15 of these Rules stipulates that all of the following criteria must be satisfied in order for a member of the Association (sales company) to engage in solicitation activities toward investors, and that the Association member in question must verify that there are no issues with regard to the protection of the investor.

[Criteria to be fulfilled by foreign investment trusts/foreign investment corporations]

• To be established based on the laws and regulations of the country or region that satisfies the following established criteria:
  ✓ To have established laws and regulations for the systems pertaining to the securities in question
  ✓ To have established laws and regulations for the disclosure of the securities in question
  ✓ To have a regulatory agency that monitors the issuer of the securities in question, or an equivalent institution
  ✓ To be able to send and receive moneys pertaining to the securities in question, such as purchase price, sales price, gains from the investment, etc.

• In cases that correspond with the dealing of Public Offering or Secondary Distribution, to be compliant with the separately established Selection Criteria*.

An overview of the Selection Criteria described above is provided as follows.

*RULES CONCERNING FOREIGN SECURITIES TRANSACTIONS
(Selection Criteria of Foreign Investment Trust Beneficiary Certificates)
<table>
<thead>
<tr>
<th>Article 16-2 Selection criteria of Foreign Investment Trust Beneficiary Certificates that are managed based on the framework of the Asia Region Funds Passport (hereinafter referred to as the “ARFP”) shall be set forth in each of the following Items:</th>
</tr>
</thead>
</table>
| **(1) Conformity to the ARFP Rules:**  
The requirements prescribed in the framework of the ARFP (hereinafter referred to as the “ARFP Rules”) shall be met; |
| **(2) Appointment of Agent in Japan:**  
An agent of the administration company shall be established in Japan. In such case, the post of the said agent is not precluded from being held concurrently by an Agent Association Member. |
| **(3) Jurisdiction:**  
Any lawsuit related to transactions in Foreign Investment Trust Beneficiary Certificates acquired by a Japanese investor shall be clearly subject to the jurisdiction of Japan. |
| **(4) Establishment of Agent Association Member:**  
The Agent Association Member shall be established in Japan. |
| **(5) Prohibition of Improper Transaction:**  
The administration company shall be forbidden to conduct transactions for the purpose of its own benefit or for the benefit of third parties other than the beneficiary of the Foreign Investment Trust Beneficiary Certificates and other transaction, etc. that compromise the protection of the beneficiary or hamper the appropriate management of the investment trust assets. |
| **(6) Change in Managers:**  
A change in the officers of the administration company shall require the approval, etc. of the relevant authorities, investors, or trustees. |

**Selection Criteria of Foreign Investment Securities**

Article 17-2 Selection criteria of Foreign Investment Securities that are managed based on the framework of the ARFP shall be set forth in each of the following Items:

| **(1) Conformity to the ARFP Rules:**  
The ARFP Rules shall be met. |
(2) Appointment of Agent in Japan:
An agent of the Foreign Investment Corporation shall be established in Japan. In such case, the post of the said agent is not precluded from being held concurrently by an Agent Association Member.

(3) Jurisdiction:
Any lawsuit related to transactions in Foreign Investment Securities acquired by a Japanese investor shall be clearly subject to the jurisdiction of Japan.

(4) Establishment of Agent Association Member:
The Agent Association Member shall be established in Japan.

(5) Prohibition of Acquiring Own Securities:
The Foreign Investment Corporation shall not acquire the Foreign Investment Securities issued by itself.

(6) Prohibition of Improper Transaction:
The management company shall be forbidden to conduct transactions for the purpose of its own benefit or for the benefit of third parties and other transactions, etc. that compromise the protection of the investors or hamper the appropriate management of assets of the Foreign Investment Corporation.

(7) Change in Managers:
A change in the officers of the Foreign Investment Corporation shall require the approval, etc. of the relevant authorities, investors, or trustees.

In Japan, in order to sell foreign investment trusts/foreign investment corporations, after securing a business operator to conduct the sales in Japan (Agent Association Member), the seller in question has to be subjected to a review on their compliance with the Selection Criteria for the securities in question.

Refer to the following “Certification flow for ARFP funds” on the procedures for the certification of ARFP funds.

As the target for review based on the abovementioned Selection Criteria is limited to open-ended foreign investment trusts and foreign investment corporations, it is necessary for the foreign fund in question to correspond with either a foreign
investment trust or a foreign investment corporation in order for it to be brought into Japan.

Note 3: Refer to Paragraphs 24 and 25 of Article 2 of the Act on Investment Trusts and Investment Corporations for the definitions of “foreign investment trusts” and “foreign investment corporations.”

Note 4: Since before, it has been possible for funds corresponding with foreign investment trusts/foreign investment corporations to be brought into Japan as regular foreign investment trusts/foreign investment corporations (regular “Regulated CIS”), even in cases where they are registered as ARFP funds in their home countries.

Of ETF and close-ended funds, those that fulfill the criteria set forth in the rules of the Japan Securities Dealers Association, such as funds listed in foreign exchanges and financial markets (limited to funds assessed to pose no issues with regard to the protection of investors), may be handled by members of the Association as “foreign equities, etc.” (trading through intermediaries/agencies to foreign financial instruments markets, or over-the-counter trading in Japan, etc.). In such cases, these instruments have already been subjected to reviews at foreign securities exchanges, and may be sold in Japan through securities companies. Hence, there is little need to regard them as targets for the ARFP. On the other hand, with regard to close-ended funds that are not listed in the markets of the respective countries, it is not easy to calculate the market values and fair value in the same way as private equities, and there is also inadequate disclosure of information to investors. Based on these reasons, they are considered to be unfamiliar instruments to be sold widely in Japan to general investors, and therefore may not be sold in Japan.

Note 5: Reviews of these funds are not carried out based on the abovementioned Selection Criteria (not subjected to the application of the Selection Criteria in line with voluntarily established rules of the Japan Securities Dealer Association), and there are also no legal requirements for the submission of notifications in accordance with the Act on Investment Trusts and Investment Corporations.

<Reference>

Please note that all of these English translated reference documents does not reflect the latest update of the original Japanese version.

※FIEA (English)

The following are the procedures for selling ARFP funds in Japan:

1. Select the local agent (refer to “5. Local agent” below) and the sales company in Japan (Agent Association Member).

2. In line with ARFP rules, prepare the application forms required when carrying out procedures for acquiring certification in the host country, as well as the document certifying the fulfilment of selection criteria, prescribed in Article 16 or Article 17 of the Rules Concerning Foreign Securities Transaction, which is the voluntarily established regulations of the Japan Securities Dealers Association (JSDA), and deliver the documents to the Agent Association Member through the local agent.

3. The JSDA shall review the Statement of Notification of Dealing in Foreign Investment Trust Securities, etc with the selection criteria of the foreign investment trust securities and notify the Agent Association Member of the result. The Agent Association Member receiving the result will inform the agent of the said result.
4. The agent receiving the notification submits the notification documents to the FSA. The FSA confirms conformity as an ARFP fund based on the ARFP MoC, and notifies the agent of the results. Then, the agent shall notify the FSA under the Investment Trust Act, either Article 58 for foreign investment trusts or Article 220 for foreign investment corporations. After that, the notification is “certified” in accordance with ARFP rules. However, sales cannot be carried out in the period until the SRS submitted after this notification takes effect (15 days after submission). The items to be included in the notification, as well as the attachments, are as described above.

It is required to attach the same documents as those that are submitted to the Japan Securities Dealers Association to the notification in such cases:

5. After the day of the submission of notification on the foreign investment trust or foreign investment corporation based on the Act on Investment Trusts and Investment Corporations, the SRS is submitted in accordance with the FIEA.

6. Public Offering (sales) is permitted after the SRS comes into effect (15 days after submission if there are no issues).

If we were to discuss the Japanese legal system in relation with Annex 1-2(2)(b) of the ARFP rules, business registration would be necessary as the acts of issuing, selling, and solicitation for fund equities (foreign investment trusts) toward Japanese sales business operators (including cases where they are undertaken by Japanese sales business operators), by operators that have not acquired the license to engage in the trading of securities or the dealing of Public Offering overseas, or by ARFP funds (issuing entity), correspond with the financial instruments business described in the FIEA. However, in cases where the investment company in question has acquired the license to engage in the trading of securities or the dealing of Public Offering overseas, it may engage in such acts without registering as a financial instruments business operator in Japan (provision in Article 58(2) of the FIEA).

Australia

In Australia there is no requirement to have a licence or exemption from holding a licence to provide ARFP fund disclosure documents (Product Disclosure Statements) to retail investors. There is no requirement to have a licence or exemption from ASIC to issue interests in the ARFP fund through a locally licensed distributor or to redeem interests issued in that way. This is because under section 911A(2)(b) of the Corporations Act, an exemption applies to the issue of an interest in a CIS under an arrangement between the issuer and a financial services licensee under which the licensee (or their authorised representative) offers to arrange for the issue and the issues are made in accordance with that arrangement, so long as the service is covered by the financial services licensee’s licence. Section 911A(2)(c) also provides an
exemption for an issuer enabling them to process the redemption of interests issued in accordance with such an arrangement.

There is generally a requirement to have a licence or exemption to provide advice and otherwise deal with distributors and platforms (as wholesale clients) in order to organise for the issue of ARFP funds. There are exemptions from the requirement to hold a licence for the following conduct relating to a foreign passport fund:

(a) giving of general financial product advice by the issuer about its own products where it is not licensed to provide advice and, at the time of giving the advice, advises the client that it is not licensed, recommends that the client obtain and read a copy of the PDS before making a decision about the product, and notifies the client about any cooling-off rights;
(b) holding of assets of foreign passport funds, regardless of the location of the assets;
(c) acquisition or disposal of a financial product as an investment of the fund by the operator of a person acting on the direct of the operator (or an agent of the operator); and
(d) the issue, acquisition or disposal of derivatives and foreign exchange contracts for the purpose of financial risk management.

Application forms

Issues and sales to retail investors must generally occur through applications using the required application form.14 The application form must accompany a PDS, and most PDS will include the application form when providing the PDS.

Minimum subscription and amount

If a PDS states that there will be no issue or sale unless a minimum number of applications are received for interests in a fund of a minimum amount raised, then interests can’t be issued until that amount is satisfied.

If the PDS condition for a minimum subscription or amount is not achieved within 4 months of the date of the PDS, then the retail investor’s money must be refunded or a new PDS given and a 1 month period to allow the investor to withdraw their application. A retail investor also has a right to return the interests in the fund and

---

14 s1016A of the Corporations Act
have their money returned, if no new PDS is given or during the 1 month period to withdraw.

**Cooling-off period**\(^\text{15}\)

Where an interest in the ARFP fund is issued or sold to a retail client in Australia, the client will have a 14-day cooling off period during which they have the right to return the product and be repaid its current value and any fees paid for acquiring it. This right to return the product will apply even where redemption is suspended. This right will not apply to interests that are quoted such as an ETF. It will also not apply in certain other cases such as reinvestment under a scheme for reinvestment of distributions.

**Advice and conflicted remuneration**\(^\text{16}\)

Retail clients must be provided with a Statement of Advice if they receive personal advice on an interest in an ARFP fund.\(^\text{17}\)

An ARFP fund is prohibited from giving an Australian licensee or authorised representative conflicted remuneration (being remuneration that could reasonably be expected to influence what financial products are recommended or the financial product advice that is given to a consumer).

**Advertising**\(^\text{18}\)

Advertising and promotional material for an ARFP fund will have to identify the issuer or in the case of a sale, the issuer and seller, and indicate that a PDS is available and where it can be obtained. The advertising and promotional material must also indicate that a person should consider the PDS in deciding whether to acquire the product.

**Prohibition of unsolicited offers (hawking)**\(^\text{19}\)

A person must not offer a retail client an interest in a foreign passport fund for sale during or because of an unsolicited meeting or unsolicited phone call, except in limited

---

\(^\text{15}\) s1019B of the Corporations Act  
\(^\text{16}\) s963K of the Corporations Act  
\(^\text{17}\) s946a of the Corporations Act  
\(^\text{18}\) s1018A of the Corporations Act  
\(^\text{19}\) s992AA of the Corporations Act
Prohibition of volume-based shelf-space fees

A financial services licensee must not accept a benefit from the operator of a foreign passport fund for making the product available through a platform where the benefit is wholly or partly dependent on the total number or value of the operator’s products to which the arrangement relates.

Consumer protections under the ASIC Act

Under the Australian Securities and Investments Commission Act 2001 (ASIC Act), a person must not engage in unconscionable conduct (actions or behaviour that go against good conscience) or misleading or deceptive conduct in relation to interests in a foreign passport fund.

Trading on a financial market

If a PDS states that the interests in the fund will be able to be traded on a financial market, then issue or sale of the interests must only occur if the interests can be traded or an application to trade has been made within 7 days after the date of the PDS.

Stop order powers

ASIC has the power to make a stop order prohibiting the operator of an ARFP fund from offering interests in Australia where:

(a) the fund or its operators are not complying, or are not likely to comply, with Australian corporations law (including the Passport Rules for Australia) or laws of the home economy administered by the home regulator (including the Passport Rules for the home economy); or

(b) the operator has ceased to be a registered foreign company, or has not had a local agent for more than 21 days; or

(c) a determination has been made by the responsible Government minister that prohibits interests in the fund being offered in Australia.

---

20 s964A of the Corporations Act
21 Division 2 of Part 2 of the ASIC Act
The stop order may also require the fund, or its operator, to take or cease any action reasonably necessary to give effect to the prohibition.

In making a stop order on the grounds of non-compliance with the Passport Rules for Australia, ASIC will request the opinion of the home regulator for the ARFP fund on the interpretation of any equivalent provision of the Passport Rules for the home economy. Although not limiting ASIC’s power to take action for a breach of the Passport Rules in Australia, ASIC will give weight to the views of the home regulator when forming an opinion of whether a stop order is necessary.

Before making a stop order on the basis of non-compliance with Australian corporations law (including the Passport Rules for Australia) or the Passport Rules for the home economy, ASIC must hold a hearing and give interested people the opportunity to make submissions on whether a stop order should be made. ASIC can make an interim stop order where it considers the delay of a hearing would be prejudicial to the public interest.

Product intervention power and issuer obligations

In July 2018, the Government invited comments on a further draft of legislation for design and distribution obligations which would apply to issuers and distributors of financial products, and a product intervention power which would enable ASIC to intervene where a financial or credit product is identified as creating a risk of significant consumer detriment. Consultation closed 15 August 2018. The final form of these new obligation and powers has not been decided.

A foreign CIS operator looking to offer foreign CIS in Korea may do so only through locally licensed distributors pursuant to article 280 of the FSCMA. The locally licensed distributors are responsible for providing the required disclosures to investors, issuing and redeeming CIS interests on behalf of the foreign CIS operator. Additionally, there is no requirement for a license or an exemption from the FSC/FSS to engage in aforementioned activities. Article 18 of the FSCMA does provide, however, that a foreign CIS operator must obtain an investment advisory business license to provide advisory services on CIS investment to retail investors.

Because eligibility requirements for foreign CIS operators and sales requirements for foreign CIS as provided in article 301 of the FSCMA differ from the ARFP rules, the
<table>

FSC/FSS expects to make appropriate rule changes to ensure consistency and harmony between the two after the ARFP is fully implemented.

The following eligibility requirements apply to foreign CIS operators:

- The size of the assets under management (AUM) of the foreign CIS operator under must not be less than KRW 1 trillion;
- The amount of capital of the foreign CIS operator must meet the minimum capital requirement;
- The foreign CIS operator must have no prior record of having been subjected to any sanction or other adverse actions by either the home or the host authorities; and
- The foreign CIS operator must have a local agent in Korea.

The followings prerequisites apply for the sale of foreign CIS:

- Interest in a foreign CIS must be issued in accordance with the laws of OECD member jurisdictions, Hong Kong, or Singapore;
- Expenses such as compensations and fees must be explicitly stated and not set at excessively high levels vis-à-vis the prevailing international standards and practices;
- Investors must be able to recover the amount invested in either a direct or an indirect manner through redemption or other available means;
- Foreign CIS operators must comply with the applicable management restrictions and requirements. (Please refer to Annex 19 of Regulation on the Supervision of Financial Investment Business.)
processes in place to ensure that their disclosure and advertising will comply with New Zealand law; and

- In practice an offshore entity would likely wish to use a local broker to locate customers and to endorse and explain the product anyway.

Beyond disclosure, advertising and fair dealing restrictions, New Zealand does not explicitly regulate the distribution of CIS products. However, where the marketing or distribution of a CIS also involves associated financial advice, the advice will be subject to the Financial Advisers Act 2008 (FA Act) (A copy of the FA Act can be obtained from www.legislation.govt.nz/act/public/2008/0091/latest/whole.html).

The FA Act places specific restrictions on activities that go beyond distribution or sales and involve the provision of ‘financial advice’. ‘Financial advice’ is provided when a person makes a recommendation or gives an opinion in relation to acquiring or disposing of a financial product and can be classified as “class advice” or “personalised advice”. Advisers need to be registered on the financial service providers register to provide a financial adviser service and may also need to be authorised by the FMA to provide a financial adviser service depending on the type of advice that is given and the type of client to whom the advice is given.

If class or personalised advice will be provided by a distributor to retail clients on behalf of the CIS operator (as agent), then the CIS operator will need to be registered on the financial services providers register. In this case the CIS operator is treated as though it provided the advice itself. If personalised advice is given to retail clients on behalf of the CIS operator, the advice will need to be given through an authorised financial adviser. We assume that CIS operators are unlikely to look to provide personalised advice to retail clients.

Participants should also be aware that the New Zealand Government has decided to amend the regulatory regime that oversees the provision of financial advice in New Zealand and the FA Act is to be replaced by new legislation. The relevant Bill has now had its second reading and is expected to be passed in late 2018 or early 2019. Proposed changes include a requirement that all persons providing regulated financial advice to retail clients are licensed or acting under a licence. We will keep this under review as the drafting of the new legislation progresses to ensure consistency with the MOC.
The ARFP Passport Fund must not be offered to investors in Thailand unless the ARFP Passport Fund has been approved by the SEC and the registration statement has become effective.

There is no licensing requirement imposed on the foreign CIS Operator seeking to offer its CIS in Thailand. In order to offer the ARFP Passport Fund in Thailand, the foreign CIS Operator is required to appoint a local licensed intermediary(-ies) who is authorised by SEC, noting that both local licensed intermediaries/distributors and local representative can be the same entity.

The entities whom the SEC permits to be local intermediaries of the foreign ARFP Passport Fund must be entities who have been granted license type:

- A (i.e. securities/ brokerage companies);
- C* (i.e. asset management companies);
- D (i.e. commercial banks); or
- Limited brokerage, dealing and underwriting of investment units (LBDU).

* Entities obtained license type C must have in place proper operational system and received approval from the SEC before being recognised as a qualified distributor.

Lists of the business entities who hold such licenses in Thailand could be found on the SEC website (click here or here).

**Sales Conduct**

The sales conduct stipulated by Notification No. TorThor. 35/2556 include:

The local licensed intermediaries/distributors shall provide the service of selling, repurchasing, and redeeming units of the ARFP Passport Fund to its clients on condition that the units of such fund are published on the SEC website which have been approved by the SEC under the SEC Notifications.

Prior to accepting to be an agent for selling, repurchasing and redeeming units of ARFP Passport Fund, the local intermediaries/distributors shall have a written agreement with the CIS Operator which covers at least the following matters:

1. in case where there is significant impact on the ARFP Passport Fund, the CIS Operator shall provide information about such impact to investors in Thailand; and
the CIS Operator shall deliver the information under the abovementioned (1) to the local intermediaries within the same period as having duty to deliver to investors in home economy or submit to Home Regulator, as the case may be.

Prior to selling units of the ARFP Passport Fund to investors in Thailand, the local intermediaries shall at least undertake the following steps:

(1) distributing the disclosure documents which contain the same material information no different from the version filed with the SEC, including Fund Fact Sheet (prepared according to the template available at the SEC’s website) and the annual report (if any); and

(2) providing any supplementary information/documents used in offering units of the ARFP Passport Fund in the Home economy of the ARFP Passport Fund. Such supplementary information must be kept at the office or on the website of the local intermediaries and delivered to investors upon request.

In case a CIS operator fails to comply with an agreement as prescribed above, the local intermediaries shall not provide any service for units of the ARFP Passport Fund managed by such CIS operator.

**Advertisement**

Upon the effective date of registration statement and draft prospectus, in case where the CIS operator wishes to make an advertisement regarding the units of the ARFP Passport Fund by a method other than a distribution of the prospectus, the information used in the advertisement shall comply with the following rules:

(1) containing no false, misrepresentation, exaggeration, distortion, concealment or misleading information;

(2) having the material information presented in the advertisement that shall not deviate from the information presented in the registration statement and draft prospectus submitted to the SEC Office.

In case where the CIS operator does not comply with the rules as specified above, the CIS operator shall comply with the orders of the SEC Office to proceed with one of the following actions:

(1) to suspend the advertisement or stop the sales promotion activities completely or partially;

**Related regulations:**
- Notification No. TorJor. 4/2561
- Notification No. TorThor. 8/2561
### 5. Local agent

| Japan | ➢ When the issuers of Beneficiary Certificates of foreign investment trusts or foreign investment corporations, or parties planning to establish such a corporation (hereinafter, “issuer”) deal in Public Offering of Beneficiary Certificates of foreign investment trusts or Investment Securities, Investment Equity Subscription Right Certificates, or securities similar to Investment Corporation Bond Certificates issued by foreign investment corporations (hereinafter, “Foreign Investment Securities”), it is required to submit a notification to the authorities beforehand (Article 58 and Article 220 of the Act on Investment Trust and Investment Corporations). However, in the submission of this notification, the issuer is required to determine a party with an address in Japan, and who has the rights to act on behalf of the issuer for all acts pertaining to this notification (Article 95 and Article 260 of the Order for the Enforcement of the Act on Investment Trusts and Investment Corporations). Typically, a lawyer in Japan is appointed as the representative who carried out notification-related work on behalf of the issuer.

➢ This representative is not required by law to be a lawyer. Hence, the issuer may decide on whom to appoint as his or her representative. However, the representative generally communicates with the Agent Association Member (sales company), and carries out work related to the drawing up/translation of documents based on laws and regulations. As such work calls for a degree of professional expertise, in actual fact, it is considered necessary to conclude some form of agreement with a lawyer in Japan.

➢ Furthermore, when selling Beneficiary Certificates of foreign investment trusts or Foreign Investment Securities in Japan, it is necessary to secure a seller in Japan (Agent Association Member) apart from the abovementioned representative, and for the seller in question to undergo a review of the securities in question for compliance with the Selection Criteria of the voluntarily established regulations of the Japan Securities Dealers Association. Refer to “4. Distribution” for details.

<table>
<thead>
<tr>
<th>Country</th>
<th>ARFP fund operators as registered foreign companies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Australia</td>
<td>The operator of an ARFP fund offered in Australia must become a registered foreign company in Australia, under Chapter 5B of the Corporations Act. For details, see: <a href="http://asic.gov.au/for-business/registering-a-company/steps-to-register-a-company/foreign-companies/">http://asic.gov.au/for-business/registering-a-company/steps-to-register-a-company/foreign-companies/</a></td>
</tr>
</tbody>
</table>

The requirement applies to any foreign company carrying on a business in Australia, although Australia will require an ARFP fund operator to register as a foreign company (and comply with the obligations as a foreign company) regardless of whether they are carrying on business in Australia or not.

The application to register as a foreign company must be in the prescribed form, and be accompanied by certain documents such as the constitution of the company in English or accompanied by a complying translation, and the prescribed fee. There are some naming restrictions (e.g., if the name of the foreign company is identical to the name of another registered foreign company).

Once registered in Australia, foreign companies are required to lodge copies of financial statements (as prepared under the law of its home economy) with ASIC and notify ASIC when some company details change.

Local agent requirements
A registered foreign company must always have a local agent or agents. A key reason for this requirement is to enable a person seeking to bring a court action against the foreign company to serve court documents on the foreign company. A local agent of a registered foreign company:

- is answerable for the doing of all acts, matters and things that the foreign company is required by or under the Corporations Act to do; and
- is personally liable to a penalty imposed on the foreign company for a contravention of the Corporations Act if a court or tribunal hearing the matter is satisfied that the local agent should be so liable.
The local agent may be an individual or an Australian company. There are no requirements about the capacity or financial position of the local agent. Typically, companies are established by lawyers or accountants to perform the role of the local agent.

If the local agent changes a new one must be appointed and notified.

<table>
<thead>
<tr>
<th>Country</th>
<th>Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Korea</td>
<td>As required under article 301 of the Enforcement Decree of the FSCMA, a foreign CIS operator must appoint a local agent in Korea when registering a CIS with the FSC/FSS. This requirement applies only to publicly offered CIS. Therefore, since an ARFP CIS is publicly offered, its operator is required to appoint a local agent. In addition, article 7-53 of the Regulation on the Supervision of Financial Investment Business provides that the appointment of a local agent is restricted to the following persons or entities:</td>
</tr>
<tr>
<td></td>
<td>• A local CIS operator;</td>
</tr>
<tr>
<td></td>
<td>• A locally licensed distributor;</td>
</tr>
<tr>
<td></td>
<td>• Any of the following entities as defined in the Attorney-at-Law Act:</td>
</tr>
<tr>
<td></td>
<td>(a) A law firm;</td>
</tr>
<tr>
<td></td>
<td>(b) A law firm with limited liability;</td>
</tr>
<tr>
<td></td>
<td>(c) A law firm association;</td>
</tr>
<tr>
<td></td>
<td>(d) An attorney at law who meets the requirements for partnership for a firm under a law firm and who belongs to a joint office as defined in the Income Tax Act; and</td>
</tr>
<tr>
<td></td>
<td>• An accounting firm as recognized under the Certified Public Accountant Act.</td>
</tr>
<tr>
<td></td>
<td>To appoint a local agent, a foreign CIS operator must submit the local agent contract to the FSC/FSS upon the completion of the registration of the foreign CIS with the FSC/FSS. After becoming duly registered, the local agent must file the required disclosure statements and other documents pertaining to the foreign CIS to the FSC/FSS and to the distributors on behalf of the foreign CIS operator. In general, the responsibility of the local agent is limited to aforementioned proxy tasks; the responsibility and liability pertaining to disclosure and document submission falls under the foreign CIS operator.</td>
</tr>
<tr>
<td>New Zealand</td>
<td>New Zealand will require a local agent for service only. The qualified distributor referred to above will not be an agent.</td>
</tr>
</tbody>
</table>
However, for practical purposes an overseas business may wish to use a local agent who would likely be better placed to source customers. ARFP fund operators will remain responsible for overseeing agents sufficiently to ensure compliance with applicable New Zealand law requirements and ARFP rules.

<table>
<thead>
<tr>
<th>Thailand</th>
</tr>
</thead>
<tbody>
<tr>
<td>A foreign CIS Operator is required to appoint a local agent / representative who is authorised and licensed by SEC. A local licensed representative must be either an entity who holds securities license granted by the Ministry of Finance (upon the recommendation from SEC), such as securities companies, commercial banks, life insurance companies, and other financial institution specified by SEC.</td>
</tr>
</tbody>
</table>

Alternatively, the CIS Operator may seek direct approval from the SEC to appoint a representative office under Section 93 of the Securities and Exchange Act B.E. 2535 (1992). In such case, the representative office must be an entity incorporated under the Thai Law with the sole purpose of acting as the representative office for the CIS Operator and therefore the representative’s revenue may only come from the CIS Operator and not from any other sources of revenue.

The responsibilities of the local representative are to facilitate the following matters in Thailand:
- disclosing and delivering the ARFP Passport Fund’s disclosure documents as required and any other information the CIS Operator wishes to disclose to the investors;
- liaising with the registrar of the ARFP Passport Fund on behalf of the unit holders in Thailand; and
- receiving notices, orders, summons or any other documents on behalf of the CIS operator or its ARFP Passport Fund.

There is no requirement for a CIS Operator who offers its ARFP Passport Fund to investors in Thailand to register as a foreign company in Thailand.

6. Access to financial markets to sell ETFs

<table>
<thead>
<tr>
<th>Country</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Japan</td>
<td>With regard to export of Japan domiciled ETFs, there are no general restrictions to export to other participating countries as investment trusts under the ARFP framework, as long as such instruments are fully compliant with the Japanese listing rules while they are sold in the participating countries. With regard to import of ETF registered in the participating countries into Japan, as described in “4. Distribution”, these are instruments that have already been subjected to reviews at foreign stock exchanges in the participating countries, and may be sold in Japan through intermediaries. Hence, in general, it would not be the case that such instruments necessarily apply to the ARFP framework.</td>
</tr>
</tbody>
</table>
| Australia| Foreign ETFs seeking to quote on an Australian financial market will be subject to requirements under the rules of that market. For example, the rules may require disclosure regarding the value of underlying assets, information about dividends or distributions paid, and prescribed PDS content. ASIC has issued Information Sheet 230 Exchange traded products: Admission guidelines\(^{22}\) to provide good practice guidance to licensed Australian exchanges that admit ETFs to ensure their admission and monitoring standards continue to support fair, orderly and transparent markets. This guidance is useful to understanding ASIC's expectations, including in relation to disclosure requirements and ETF naming requirements. In the case of foreign ETFs not seeking to quote on an Australian financial market, an issuer is still subject to PDS and ongoing disclosure requirements. ASIC expects that foreign issuers will:  
  - comply with the naming conventions in INFO 230 in relation to the name of the ETF (to promote investor understanding of the product, and that they are not misled);  
  - ensure that the PDS identifies any key distinctive characteristic of the foreign ETF issuer's home market that differ from what a retail client may expect based on the Australian financial markets; and |

---

---

60
• provide information about how an Australian investor can trade their interests, including if they need to engage a foreign broker to trade through the foreign financial market in foreign currency.

Foreign market participants would not need an Australian financial services licence to buy or sell ETFs on a foreign exchange on behalf of an Australian investor so long as:
• they do not engage in conduct intended to induce people in Australia to use their financial services or that is likely that effect;
• if the client is a wholesale client and the client does not carry on business in Australia (although this provision is under review); or
• an Australian licensee on behalf of the client arranges for the foreign market participant to sell: Corporations Regulation 7.6.01(1)(n).

Persons in other ARFP economies would not be subject to legal impediments if they wish to sell exchange traded ARFP fund units quoted on a financial market in Australia (apart from any identification requirements under anti money laundering laws that might apply). For example, Australian law does not prohibit Australian market participants from dealing in interests in Australian ETFs (based on their typical characteristics which don’t confer control or substantial holding in Australian companies) on behalf of foreign investors if the investor’s home jurisdiction permits. A PDS would be required to be lodged to permit offers of sales being made to persons in Australia, but this will have occurred as it is necessary to enable trading in Australia.

There are no general restrictions on transferring money to or from Australia as a result of transactions involving persons in Australia (apart from certain countries or circumstances when sanctions apply). Australian financial institutions would have to comply with AML/CTF laws.

Korea

Regarding the issuance or sale of interests in a foreign exchange traded fund (ETF) in Korea, an ETF must be registered as a foreign CIS with the FSC/FSS pursuant to article 279 of the FSCMA and meet the listing criteria set by the Korea Exchange (KRX). For registration, the ETF must also comply with the eligibility prerequisites and the sales eligibility requirements applicable to foreign CIS operators as provided under article 301 of the Enforcement Decree of the FSCMA. However, please note that the eligibility requirement and prerequisites for an ARFP CIS will vary from the current ones for a foreign CIS after the ARFP is fully implemented.

The following eligibility requirements apply to foreign CIS operators:
The size of the assets under management (AUM) of the foreign CIS operator under must not be less than KRW 1 trillion;

The amount of capital of the foreign CIS operator must meet the minimum capital requirement;

The foreign CIS operator must have no prior record of having been subjected to any sanction or other adverse actions by either the home or the host authorities; and

The foreign CIS operator must have a local agent in Korea.

The followings prerequisites apply for the sale of foreign CIS:

- Interest in a foreign CIS must be issued in accordance with the laws of OECD member jurisdictions, Hong Kong, or Singapore;
- Expenses such as compensations and fees must be explicitly stated and not set at excessively high levels vis-à-vis the prevailing international standards and practices;
- Investors must be able to recover the amount invested in either a direct or an indirect manner through redemption or other available means; and
- Foreign CIS operators must comply with the applicable management restrictions and requirements. (Please refer to Annex 19 of Regulation on the Supervision of Financial Investment Business.)

For listing, foreign ETFs must also satisfy the listing criteria set by the KRX as prescribed in article 42-2 of the Securities Market Listing Regulation. When an ETF is duly registered and becomes listed on the KRX, there are no legal impediments for investors in buying or selling ETFs that are quoted on the market in Korea. Please follow the link below provided below for additional information on KRX listing:

to conduct customer due diligence (CDD) such as identifying customer identification data, purpose of conducting a transaction, an occupation/contents of business, beneficial ownership, etc.

- **Verification Records** – Specified business operators are required to make verification records immediately upon conducting CDD and such records must be kept for a specified period.

- **Transaction Records** – Specified business operators are required to make transaction records immediately upon carrying on transaction regarding specified business and such records must be kept for a specified period.

- **Suspicious Transaction Reports** – Specified business operators are required to report suspicious transactions promptly to competent authorities when property accepted through specified business affairs is suspected to have been criminal proceeds or a customer is suspected to have been conducting money laundering.

Foreign investment business operators (operator) that carry out investment activities on ARFP funds are required to sell funds in Japan through business operators that are registered as financial instruments business operators. As such, the acquisition of the personal information of Japanese investors is, in principle, not assumed to take place. However, in cases where the foreign investment business operator fulfills the requirements under the Act on the Protection of Personal Information, it is important to note that there are cases where it is mandatory to comply with the same Act and the abovementioned Guidelines (clearly stipulated in Article 75 of the revised Act on the Protection of Personal Information scheduled to be enforced in the first half of 2017).

The main regulations that financial instruments business operators should comply with, as set forth in the Guidelines, are listed as follows.

- Business operators that handle personal information in the financial industry shall comply with **Article 15 of the Act**, and in handling personal information, shall specify as far as possible how the personal information is to be provided for business use, and the purposes that the information will be used for that can be reasonably expected by the person to whom the information belongs. **(Paragraph 1 of Article 3 of the Guidelines)**

- Business operators that handle personal information in the financial industry shall comply with **Article 16 of the Act**, and shall not handle personal information beyond the scope necessary for achieving the specified purposes.
for the use of the information as set forth in Article 15 of the Act, without obtaining the prior consent of the person to whom the information belongs. **(Paragraph 1 of Article 5 of the Guidelines)**

- The two provisions stated above are not applicable in the following cases: (1) When based on laws and regulations; (2) When it is necessary for the protection of the person’s life, body, or property (including corporate assets), and when it is difficult to obtain the consent of the person to whom the information belongs; (3) When it is particularly necessary in order to improve public health or promote healthy child development, and when it is difficult to obtain the consent of the person to whom the information belongs; (4) When it is necessary to cooperate with a governmental institution, local public organization, or a person entrusted to complete a legally stipulated task, and when obtaining the consent of the person to whom the information belongs may obstruct the completion of the said task. **(Paragraph 2 of Article 5 of the Guidelines)**

- Business operators that handle personal information in the financial industry shall comply with Article 23 of the Act, and shall not provide personal data to a third party without the prior consent of the person to whom the information belongs, with the exception of the following cases: (1) When based on laws and regulations; (2) When it is necessary for the protection of the person’s life, body, or property (including corporate assets), and when it is difficult to obtain the consent of the person to whom the information belongs; (3) When it is particularly necessary in order to improve public health or promote healthy child development, and when it is difficult to obtain the consent of the person to whom the information belongs; (4) When it is necessary to cooperate with a governmental institution, local public organization, or a person entrusted to complete a legally stipulated task, and when obtaining the consent of the person to whom the information belongs may obstruct the completion of the said task. **(Paragraph 1 of Article 13 of the Guidelines)**

Note that after 2017, Article 24 of the Revised Act on the Protection of Personal Information requires that the prior consent of the person to whom the information belongs shall be obtained to provide information to a third-party outside of Japan, in cases where personal data is to be provided to a third party outside of Japan.

- Business operators that handle personal information in the financial industry, in principle, shall obtain written consent from the person to whom the information belongs, in accordance with Articles 16 and 23 of the Act. **(Article 4 of the Guidelines)**
• Business operators that handle personal information in the financial industry shall not acquire, use, or provide to a third party information pertaining to political views, faith (religion, philosophy, and beliefs), participation in labour unions, races and ethnic backgrounds, family origins and legal domiciles, health care and sexual life, and criminal history (hereinafter, “sensitive information”), with the exception of the following cases. (Paragraph 1 of Article 6 of the Guidelines)

• Business operators that handle personal information in the financial industry shall comply with Article 25 of the Act, and shall disclose personal data held to the individual without delay when disclosure of the personal data held that enables the identification of the individual in question is required by the same individual through written document (or a means agreed to by the person requesting disclosure, if any). However, in accordance with each item in Paragraph 1 of the same Article, in one or more of the following cases, it is possible to withhold the disclosure of all or part of the information.
  ① When it may cause harm to the lives, body, property, or other interests of the person to whom the information belongs or to a third party.
  ② When it may cause significant obstruction to the proper conduct of the business of the business operator handling the personal information.
  ③ When it violates other laws and regulations.

When business operators handling personal information in the financial industry, pursuant to the stipulations of each item in Paragraph 1 of the Act, decided to withhold disclosure of all or part of the personal data requested, the operators shall notify the individual in question of that decision immediately and without delay. It shall also explain, immediately and without delay, the reasons behind that decision, and provide the facts that the decision is based on as well as the legal provisions that justify the decision. (Article 15 of the Guidelines)

• Business operators handling personal information in the financial industry shall put in place the necessary and appropriate measures to establish the basic policies and regulations pertaining to secure management, as well as systems for security measures, in order to prevent the leakage, loss, or damage to the personal data that they handle, and to ensure the secure management of personal data. (Article 20 of the Act, and the Basic Policy on the Protection of Personal Information)

• Business operators that handle personal information in the financial sector shall comply with Article 21 of the Act, and build an appropriate internal control system to carry out the necessary and appropriate supervision of their
employees, in order to ensure the secure management of personal data.

(Employees are persons who are engaged in work in the organization of the business operator handling personal information, under the direct or indirect instructions of the business operator. It includes not only employees of the organization (regular, contract, commissioned, part-time, and temporary employees), but also those who do not have an employment relationship with the business operator (directors, executive officers, board members, auditing officers, auditors, dispatched employees, etc.) [Paragraph 1 of Article 11 of the Guidelines]

In cases where all or part of the work of handling personal data is entrusted to another business operator, business operators that handle personal information in the financial industry shall comply with Article 22 of the Act in order to ensure the secure management of this personal data that is entrusted to them, and carry out appropriate and necessary supervision of the business operator to which this personal data is entrusted. [Paragraph 1 of Article 12 of the Guidelines]

Australia

Privacy

A copy of the Privacy Act 1988 (the Act) can be obtained from www.comlaw.gov.au.

The Act will only apply to organisations in their dealings with investors if there is an Australian link (s2A and s5B of the Act). In the circumstances where a foreign ARFP fund sells to Australian retail investors through a financial services licensee (refer to the above information on distribution) and relies on that Australian intermediary to collect information for know your client (KYC) reporting purposes, the Act is unlikely to apply to a foreign ARFP fund (s5B(2) and (3)).

However, the Act will apply to the Australian intermediary. An Australian intermediary will fall within the definition of an ‘APP entity’ as an organisation (s6 and s6C) and will therefore be required to comply with the Australian Privacy Principles (APPs) (s6A(1)), which set out rules for collecting, storing and disclosure of personal information.

An Australian intermediary will be permitted to collect personal information where it is reasonably necessary for one or more of the organisation’s functions or activities (APP 3.2). It would be considered reasonably necessary for an Australian intermediary to collect personal information where it requires the information to be able to effectively pursue a function or activity (see paragraph B.109 of the APP Guidelines). In collecting the information, an Australian intermediary must also take reasonable steps to notify an
individual which it has collected information from of information including the fund’s contact details, the circumstances and purpose of collecting the individual’s information, the consequences if the individual’s information is not collected, whether it is likely to disclose that information overseas, and if practicable, the countries where the information will be disclosed (APP 5).

Information collected by an Australian intermediary may be used or disclosed for the primary purpose for which it was collected, or for a secondary purpose. In order for an Australian intermediary to disclose personal information it has collected to a person who is overseas, whether for a primary or secondary purpose, it will be required to take reasonable steps to ensure that the overseas recipient does not breach the APPs (APP 8.1) unless:

• the Australian intermediary expressly informs the individual (to which the information relates) that if they consent to the disclosure, APP 8.1 will not apply; and
• the individual consents to the disclosure (APP 8.2(b)).

Where an Australian intermediary is disclosing the personal information to a foreign ARFP fund for a secondary purpose (i.e. the intermediary collected the information for its own uses but is also disclosing the information to a foreign ARFP fund), the Australian intermediary must also obtain the individual’s consent to disclose the information for a secondary purpose (APP 6.1(a)).

Note that consent may be express or implied (s6(1)).

In obtaining consent, an Australian intermediary can obtain an individual’s consent to disclose a particular kind of personal information to the same overseas recipient for the same purpose on multiple occasions, as long as it expressly informs the individual of the potential consequences of providing that consent.

**AML/CTF**

Australia’s AML/CTF regime applies to persons (known as ‘reporting entities’) who provide any of the ‘designated services’ listed in section 6 of the *Anti-Money Laundering and Counter-Terrorism Financing Act* (AML/CTF Act). Item 35 of table 1 of section 6 lists the issuing or selling of securities in managed investment schemes (MIS) as a designated
service. A passport fund is treated as if it were an MIS for the purposes of the AML/CTF Act.

Generally, reporting entities are regulated where the designated services they provide have a geographical link with Australia, and are provided through a ‘permanent establishment’.

A ‘permanent establishment’ is a place at or through which the person carries on any activities or business, and includes a place where the person is carrying on activities or business through an agent.

As outlined above (at 5. Local Agent), Australia intends to require the operator of a ‘notified foreign passport fund’ to be registered as a foreign company under Chapter 5B of the Corporations Act 2001. Chapter 5B requires a registered foreign company to have a local agent in Australia. Satisfaction of the permanent establishment test will depend on whether the foreign fund ‘carries on any activities or business’ (within the meaning of Section 21 of the AML/CTF Act) through the local agent or registered office in Australia or other person in Australia. This is a question of fact, and will depend on how the foreign fund provides their services to the customer (i.e. whether the interests in the fund are sold online or through the agent or registered office).

The AML/CTF Act imposes five key obligations on reporting entities:

- **Enrolment** – enrol with AUSTRAC and provide prescribed enrolment details.
- **Establish and maintain an AML/CTF program** – to help identify, mitigate and manage the money laundering and terrorism financing risks a business faces.
- **Customer due diligence** – identify and verify the customer’s identity, and conduct ongoing customer due diligence (also known as Know Your Customer (KYC)).
- **Reporting** – notify authorities of suspicious matters, threshold transactions and international funds transfer instructions.
- **Record keeping** – keep records of transactions, customer identification, electronic funds transfer instructions and details of AML/CTF programs.
Australia applies a risk based approach to AML/CTF regulation – businesses must meet the minimum obligations set out in the AML/CTF Act and AML/CTF Rules, and can determine how they do so. Each business must assess the risks of potential money laundering or terrorism financing activity when providing a designated service to a customer.

AUSTRAC has published detailed guidance (the **AUSTRAC Compliance Guide**) to assist reporting entities meeting their compliance and reporting obligations.

<table>
<thead>
<tr>
<th>Korea</th>
</tr>
</thead>
</table>
| Pursuant to Credit Information Act and Private Data Protection Act, a person or entity in charge of data processing may engage in the following activities upon approval of data owner and/or when relevant law and regulations permit:

- Collecting information;
- Using the information for the purpose it was collected for; and
- Providing information to a third party

In accordance with Act on Reporting and Using Specified Financial Transaction Information, when a counterpart is suspected of engaging in money laundering activities under reasonable evidence, financial institution, etc. shall report the case to the Commissioner of Korea FIU. This provision shall preferentially apply to provisions on data protection stipulated in the Act on Real Name Financial Transactions and Confidentiality.

<table>
<thead>
<tr>
<th>New Zealand</th>
</tr>
</thead>
</table>

The Act and the 12 Principles allow trans-border data flows provided the principles are preserved. The foreign ARFP fund or intermediary would actively need to consider how this would be achieved.

Examples of how the principles work is that personal information:

- must collected for lawful purposes only;
• should be collected directly from individuals;
• is collected in a legal manner;

There should be notice of the collection of personal information provided to the investor including the purpose of the collection and that individuals have right to access and correct their data.

We note that it is relatively common for businesses operating in New Zealand to hold New Zealand customer data in Australia (the exception being particularly sensitive businesses that are required to retain customer records in New Zealand).

However, we also note New Zealand businesses have historically had issues storing customer information offshore, or sending information offshore, to jurisdictions where the information becomes vulnerable to being accessed under a local law that is inconsistent with New Zealand privacy principles. As an example it would be problematic to store information in or send information to jurisdictions where local laws would give local authorities indiscriminate access to that information and no restraint on how that information would then get stored or used.

Please note that in March 2018 the New Zealand Government introduced a new Bill intending to repeal and replace the existing Privacy Act. The new Privacy Bill retains the existing Act’s privacy principles, but introduces some significant changes such as mandatory reporting of privacy breaches.

The AML/CFT Act contains a set of compliance obligations for reporting entities.

Reporting entities include financial institutions and casinos, with financial institutions further defined by reference to a list of financial activities carried on. The financial activities must be carried on in New Zealand in the ordinary course of business. This implies a place of business in New Zealand from where the activity is directed. This is likely to include New Zealand staff and / or infrastructure that provide the means to carry on the activity. A financial activity may also be carried on in New Zealand by an overseas entity where the entity is actively and directly advertising or soliciting business
from persons in New Zealand to such an extent that requires it to be registered as an overseas company under the Companies Act 1993.

Key obligations include:

- Preparing a risk assessment
- Preparing an AML/CFT programme
- Conducting customer due diligence
- Reporting suspicious transactions
- Filing an annual report

| Thailand | Under Section 13 of the Anti-Money Laundering Act B.E. 2542 (1999) ("AML Act"), a financial institution under the AML Act, e.g. any securities company, is required to report the transaction it made to the Anti-Money Laundering Office ("AMLO") when any of the following transactions occurs:

1. a cash transaction exceeding the threshold prescribed in the Ministerial Regulation;
2. a transaction connected with the asset worth more than the value prescribed in the Ministerial Regulation; or
3. a suspicious transaction, whether it is the transaction under (1) or (2) or not.

The foreign ARFP Passport Fund must obtain consent from its clients in Thailand to be able to collect, retain, and report such information to respective home regulators and/or other home government authorities in accordance with home economy laws and regulations. Such consent may be prescribed in the contract between the client and the CIS Operator having duty to report such information under its home laws and regulations.
